FIFTEENTH ANNUAL REPORT OF THE FREE LIBRARY & MUSEUM COMMITTEE, *For the Year ending September 29th, 1886.*

THE Free Library and Museum Committee, in presenting their Annual Report, congratulate the Council on the steady increase in the popularity of the Institution.

After the recent large additions of new books, less has naturally been done in that direction during the past year, and your Committee's attention has been assiduously devoted to keeping the books already in the Library in a fit condition for use. The number of books bound and repaired has been abnormally large, amounting to a little over four thousand.

A very gratifying feature is the increased use made of the books in the Reference Library. The Library of Patents is also very largely consulted.

The number of visitors to the Institution was carefully counted in the first week of the month of April, and reached the large figure of 13214 for the week, an abundant proof of the usefulness of the Institution. If counted in the winter months the number would be considerably greater.

The attention of the Committee was specially drawn last winter to the great consumption of gas, as well as to the defective lighting of some parts of the Institution. A Sub-Committee was appointed to take the matter in hand, and on their recommendation one of Stott's Gas Governors was put up in February last, certain alterations were made in the lighting of the Library and basement, and the lighting of the reading rooms was entirely remodelled. The use of the governor has effected a great saving, and the whole of the building is now better lighted at less expense. The thanks of the Committee are due to the sub-committee of gentlemen who have so effectively dealt with this matter.

Reference should be made in this Report to the loss the Committee have sustained in the death of Mr. Edward Lott. Although failing health had for some time prevented his regular attendance at the meetings of the Committee, Mr. Lott's great services to the Institution at large, and especially to the Book Committee, cheerfully rendered for a long period of years, demand grateful recognition and record.

The Librarian's Annual Report to this Committee, containing the usual tabulated statements, and one or two others of additional interest, is appended; and in conclusion, the Committee have much satisfaction in stating that, to the best of their belief, the Institution as a whole is in thoroughly good working order.

On behalf of the Committee,

WILLIAM HOBSON,

CHAIRMAN.

Derby, Oct. 28th, 1886.

*To the Chairman and Members of the Free Library
and Museum Committee.*

Gentlemen,

I have much pleasure in submitting to you my first Annual Report, which deals with the work done in the Institution since Sep. 29th, 1885.

As far as the Library is concerned, we have now 13256 books in the Lending Library, and 8184 in the Reference Department, as against 13020 and 7850 respectively last year. The total issue of books is 128,719, against 111,864 last year; and the average daily issue is 501, against 438, showing a steady improvement in all respects. 611 new books have been bought, and 112 worn out copies have been replaced by new ones, while 1180 books have been rebound, and 2835 books repaired. 1356 new borrowers have been added during the year, and only 63 cards have been cancelled, leaving the total number of borrowers at present on the books as 12,113, more than one-eighth of the inhabitants of the borough. On the whole the books are very well used, and very few cases are met with of carelessness, and still fewer of wilful misuse. The privilege of having such a valuable Institution in their midst seems to be fully appreciated by the inhabitants. My personal work in connection with the Library has consisted in making myself conversant with the method of issuing books and registering the issues, superintending the

quarterly Stock takings, and the preparation of a supplementary catalogue of about 2900 books, which was very much wanted, the last being issued in July, 1883. The Library is, and has been during the year, in thoroughly good working order.

In the Museum, my work has been the re-arrangement of the birds, the collection of the late Rev. E. Jebb, kindly presented to the Institution by his widow, being now incorporated with the rest. The whole collection will shortly be re-labelled. A portion of the fine collection of shells has also been re-arranged and re-mounted, and will shortly be completed. My great want with regard to Museum work is time ; the work has to be done in the intervals of my other duties, but though much remains to be done, I hope shortly to be able to report the Museum in as satisfactory a condition as the Library.

The Newsrooms are not the least popular part of the Institution. In the evenings, and on wet days especially, every newspaper and magazine has its reader, and crowded as the rooms frequently are by all classes, I have never had throughout the year serious cause of complaint respecting the conduct of those who are frequenters. Since August 1st the news rooms have experimentally been closed at half-past nine o'clock instead of ten.

My report would be incomplete did I not speak of the highly satisfactory way in which the assistants do their work. I believe that the whole of the staff are animated with a desire for the efficient working and success of the Institution, and co-operate zealously to that end.

I append to this report the usual tables, and two additional ones, Nos. VI, VII., which will be of interest.

I am, Gentlemen,

Your obedient Servant,

W. CROWTHER,

Librarian and Curator.

REPORT

OF THE

CORPORATION ART GALLERY COMMITTEE

For the Year ending September 29th, 1886.

THE Art Gallery Committee, in presenting their Annual Report, are glad to be able to state that the public appreciation of the Gallery shows no diminution. The rooms have been open during the past year 283 days. On the 235 days on which visitors were admitted by payment 16906 entered, while 12120 passed the turnstiles on the 48 free days, making the total number of visitors 28326. The weekly free day has been imposed on the Committee by the authorities at South Kensington, who make it a condition wherever they grant loans of art objects, that on at least one day in the week they shall be open to all without fee. This regulation, in the opinion of the Committee a very wise one, and the large extent to which the inhabitants avail themselves of it, seem to point out clearly the way in which this and kindred institutions may become most popular and most useful, and your Committee would be very glad if financial considerations permitted the extension of the privilege of free admission.

The Committee regret very much that they have to come to the Council for a somewhat larger sum this year, but the reasons are not far to seek. Extensive repairs to the roof have had to be undertaken, and various new fittings have been supplied, which have increased the Fittings and Repairs Account some £50; the defalcations of the late Curator were about £35, and the revenue, owing partly to the introduction of the weekly free day, and partly to the decrease in the picture sales, which is undoubtedly owing to the depression in trade, shows a diminution of £26. The Committee believe that the year just commenced will show some important reductions in expenditure, and they think that with careful management and better times, that next year's balance sheet will show considerable improvement. They cannot hold out any hope of the Art Gallery becoming self supporting, but they think that the comparatively small sums which may from time to time be required

will be spent in fostering good taste and a love of the beautiful among the inhabitants of the town, as well as giving valuable help to those of its manufactures in which Art plays a part.

The last Autumn Exhibition consisted of a large and varied collection of works by modern artists in oil and water colours. It was open from September to February, and was attended by 9067 persons.

The Spring Exhibition afforded an opportunity of carrying out an idea before mooted, that of an Exhibition of Photographs. The Committee offered silver and bronze medals, and some of the best photographic artists of the country competed. The Exhibition was very popular, and may with advantage be repeated at some future time. In addition to the Photographs, there was an Exhibition of Paintings by local artists, and T. Battersby, Esq., of Derby, lent 65 pictures from his fine collection, and valuable pictures were also lent by W. Lockwood, Esq., of Nottingham, and by an esteemed member of our Committee, R. Keene, Esq., to all of whom the best thanks of the Committee are due.

On the Saturday evenings between Christmas and Easter the Curator gave a series of Promenade Concerts, which were well attended, were much appreciated, and proved a not inconsiderable source of income. The Spring Exhibition closed early in August, and was visited by 16426 persons.

Through the influence of F. Seymour Haden, Esq., the President of the Society of Painter-Etchers, that Society decided to hold its Annual Exhibition for the year 1886 in our Gallery. A very interesting Exhibition was opened on September 1st, and has already been attended by 2833 visitors. The thanks of the Committee are specially due to Mr. Haden for his intervention on behalf of the town with which he is so much connected by family ties and old associations. The Committee are glad to announce that Mr. Haden has promised at some future time to present to the Art Gallery a complete set of his own works, a most handsome gift, the value of which it will be difficult to over estimate, proving, as it does, that there will be no lack of similar gifts when it becomes known that there is a suitable depository for them.

Five of the cases in the Lower Gallery have been filled during the year by loan objects from South Kensington Museum. These objects will shortly be exchanged for others. The Committee gratefully acknowledge the ready assistance in their work they have at all times received from the Museum authorities. The Art Gallery is also indebted to many others for loans of interesting exhibits. Among these are Messrs. Doulton and Co., of Lambeth, Messrs. Tooth and Ault, of Bretby, and Messrs. Calvert and Lovatt, of Langley, for Art Pottery; J. A. Jacoby, Esq., M.P., for his collection of Antique Silver; Alfred Swingle, Esq. for a collection of Oriental Curiosities;

the Derby Crown Porcelain Co. and Mr. S. Hancock for their collections of Derby China ; the Rev. Canon Olivier for two exquisite Panels by Tinworth ; and T. Battersby, Esq. for valuable Bronzes and Oriental China.

The Committee desire to acknowledge here a valuable gift by Mr. Thomas Austin, of Derby, in the shape of a perfect specimen of the famous vase known as the King's Vase, made at the Derby China Works in 1832.

It only remains to be said that on the close of the Painter-Etchers' Exhibition it will be immediately succeeded by the customary Autumn Exhibition, for which some very interesting pictures have been promised.

On behalf of the Committee,

W. BEMROSE,

CHAIRMAN.

SIXTEENTH ANNUAL REPORT

FOR THE

FREE LIBRARY AND MUSEUM COMMITTEE,

For the Year ending September 29th, 1887.

THE Free Library and Museum Committee in presenting their Sixteenth Annual Report, desire to congratulate the Council on the continued and increasing prosperity and utility of the Institution.

It will be seen that large additions have been made to the Lending Library during the year. To this Department a New Musical Section has been added, which at present contains copies of the best known oratorios and operas, books of standard songs, and copies of standard text books on musical subjects. This department is already proving useful, and no doubt will be extensively drawn upon as time goes on. The number of books bound and repaired during the year amounts to 4054. With the exception of the magazines and the book music, these have all been done on our own premises, by our own workmen.

Fewer additions have been made to the Reference Library, but both it and the Specifications of Patents continue to be very largely consulted, and the issues show a steady increase.

The alterations in the gas arrangements referred to in last year's Report continue to work satisfactorily, and the Committee note with pleasure the fact that the gas bill is lower by £21 than last year's, and by £25 than that of 1885. The reduction in

the establishment charges generally is most gratifying, and has enabled the Committee to deal with several important matters.

In the first place, the Committee have been enabled to repaint and clean thoroughly the news rooms and corridors. This, coupled with some necessary cleaning in the Curator's house has cost about £74. Next year they hope to be able to deal with the Museum in the same way. They have also long thought it desirable to reduce by degrees, and to pay off as soon as possible the £500 they have on loan. They have during the past year been able to set aside £100 towards a sinking fund for this purpose, and in the absence of unforeseen sources of expense, hope to do the same in succeeding years till the debt is discharged.

The Librarian's Annual Report to this Committee is appended hereto. It contains the usual statistics, to which all those interested in the inner working of the Institution are referred. The Committee believe that the Institution was never more flourishing, and that it is being worked in a thoroughly efficient manner, and at an economical rate.

On behalf of the Committee,

WILLIAM HOBSON,

CHAIRMAN.

OCTOBER 27th, 1887.

*To the Chairman and Members of the Free
Library and Museum Committee.*

GENTLEMEN,

I have much pleasure in submitting to you my second Annual Report.

The past year has been a prosperous one as regards the Library. The stock in the Lending Library numbers 13,796 volumes, and that of the Reference Library 8376 volumes against 13,256 and 8184 last year, or an increase of 732 volumes. The total number of Books in the Library is therefore 22,172. The total issue has been in the Lending Library 131,641, and in the Reference Library 28,070, a net increase on last year's issues of 9573 volumes. The increase in the number of works read is greater than is apparent from these figures, as the old books in three volumes are being

gradually withdrawn, and are being replaced by single volume editions. Three books have been lost and paid for, and three have been totally lost through default of borrower and guarantor. The number of books rebound has been 850, and books repaired 3204, a total of 4054, while 58 books have been withdrawn as worn out. These have been replaced by new ones where the Book Committee thought it desirable. I have again to report with much pleasure that the books as a whole are very well used, and very few cases of either careless or wilful damage have come under my notice during the past year. The Library is now in good working order, and the Books in a good state of repair.

You will notice a considerable discrepancy between the total number of borrowers given in last year's report and the present one. It has been the practice to retain on the list of borrowers all who have not formally surrendered their tickets, and it came frequently under my notice that tickets were used by others than those to whom they were originally issued. Acting under your directions, I gave notice to all who entered the Library before January 1st, 1885, that their guarantees must be renewed. As the result of this, we find that only about 1300 of the 10,314 borrowers concerned are at present using the Library. Adding this to the number of borrowers entered since the above date, and deducting the surrendered cards, I arrive at 4500 as the approximate number of tickets now in force, a number much more probable on the face of it than the high figures hitherto given. The new borrowers during the last year number 1267 against 1356 the previous year. For the future, the guarantee will last three years, and notice will be given monthly to those whose time has expired. The number of borrowers since the opening of the Institution is now 13,706.

The Newsrooms are as much frequented as ever. Incidental countings taken by me from time to time prove that the number of visitors given in last year's returns was well within the mark. With few exceptions, the conduct of those attending the Newsrooms is exemplary.

My work in the Museum has consisted in the completion of the re-arrangement of the shells, and a commencement of the fossils. About a thousand of the latter have been re-mounted and labelled, and I am indebted to Mr. J. W. Carr, B.A., of Nottingham, for most valuable help in naming them. The re-arrangement of the Mineral collection has been kindly undertaken by Mr. A. H. Stokes, and Mr. H. Arnold Bemrose, M.A. This has been a work involving much

labour and time, but it is now approaching completion, and the specimens will in the course of a few months, be properly arranged and labelled. I shall be very glad when I am able to report the Museum in as good order as the Library.

I am glad to again bear testimony to the zeal and industry of the staff. I have had no single case of complaint against any of them since I took charge, and all their duties are discharged cheerfully and willingly, and with due regard to the best interests of the Institution.

I append the usual tables, to which I beg to refer all who wish for detailed information, and beg to remain, gentlemen,

Your obedient Servant,

W. CROWTHER,

LIBRARIAN AND CURATOR.

OCTOBER, 27th, 1887.

REPORT

OF THE

CORPORATION ART GALLERY COMMITTEE.

For the Year ending September 29th, 1887.

THE Art Gallery Committee have much pleasure in presenting their Fifth Annual Report, and are glad to be able to state that the appreciation of the Gallery by the public is steadily on the increase. The Gallery has been open 264 days during the past year, of which 43 have been free. The attendance on the free days has been 14,673, or a daily average of 341; by payment 15,477; average, 70 daily, making a total of 30,150 visitors, against 28,326 last year. The Committee regard with pleasure the large attendance on the free days, and would be very glad if financial considerations permitted the extension of the privilege.

The Committee find much gratification in the fact that the deficiency in their funds is much less this year than last, amounting only to £195, against £303 in 1886, and this without the Institution having suffered at all either in interest or efficiency. Every care has been exercised in the management, and the Committee think that the Institution can scarcely be worked more cheaply, and that while present conditions are maintained, the above amount will represent about the average annual cost to the town in time to come. They are persuaded that the advantages to the town in possessing such an Institution in its midst, maintained at such a small cost, can scarcely be over rated.

The Autumn Exhibition last year extended from November 6th to February 19th, and was attended by 10,160 visitors. There was a successful Art Union in connection with it, and the picture sales were about normal.

The Spring Exhibition consisted of pictures by Local Artists, and a loan collection. For the latter the Committee are indebted to Mr. H. H. Bemrose, and Mr. W. Naylor, who kindly lent a large portion of the pictures from the collection of the late Mrs. Walters, also to Messrs. Bemrose and Sons; and to Mr. E. Wilson. The Exhibition was open from March 5th to June 4th, and was visited by 8241 visitors.

The Photographic Exhibition in the Summer of 1886 was so much appreciated, that this year another was held which was open from June 20th to August 23rd, and was visited by 7554 persons. The Committee were indebted to the Borough Members, Sir W. V. Harcourt, and Mr. Roe, for the offer of a Gold Medal for competition, and also to Mr. R. Keene for the offer of a Silver Medal for the best photograph by a member of the Derby Photographic Society. These were given in addition to the usual silver and bronze medals. Some of the best photographic artists in the kingdom exhibited, and the Exhibition was very popular with the public.

The Autumn Exhibition now being held was opened on September 7th, and is being extensively visited. It is admitted on all hands to be one of the best ever held in the Gallery, and the visitors average about a thousand weekly.

During last Winter, a series of twenty Popular Concerts was arranged by the Curator for Saturday evenings. These concerts were attended by 3876 persons, and produced a net profit of £37 9s. The best thanks of the Committee are due to the Curator and to those ladies and gentlemen who kindly gave their services as vocalists and instrumentalists.

The Upper Gallery has been painted and re-coloured, and boarded round to the height of eight feet, which greatly facilitates the work of picture hanging, and the lower gallery has been thoroughly cleaned and re-coloured. Snow boards have been fixed to the roof, and the whole of the building is now in thorough repair.

Four cases only are now filled from South Kensington Museum, and the Committee are indebted to the following gentlemen for the loan of objects of art and interest for Exhibition. Messrs. Doulton and Co., Lambeth, for Art Pottery, Mr. J. A. Jacoby, M.P., for collection of early English Silver, Mr. W. H. Willett, of Brighton, for Burmese Curiosities, Mr. Councillor Battersby, for Bronzes and Antique China, Mr. H. H. Bemrose, for collection of Ancient Manuscripts and Printed Books, Mr. W. Bemrose, J.P., for a collection of Indian Metal Work, and Mr. Maw, of Tenant Street, for a collection of Old Derby China.

On behalf of the Committee,

WILLIAM BEMROSE,

OCTOBER 27th, 1887.

CHAIRMAN.

SEVENTEENTH ANNUAL REPORT

OF THE

FREE LIBRARY AND MUSEUM COMMITTEE

For the Year ending September 29th, 1888.

THE Free Library and Museum Committee beg to present their Seventeenth Annual Report to the Council, and in doing so, beg to congratulate them on the continued prosperity and usefulness of the Institution.

Large additions of Books have been made to both Libraries during the year, in the selection of which the Book Committee have exercised much vigilance and care, and the works purchased have been supplemented by a handsome gift of 42 volumes, chiefly of a valuable scientific character and for reference, from the Delegates of the Clarendon Press, Oxford. The warmest thanks of the Committee and the Council are due to the University of Oxford for this welcome addition to the Reference Library.

The Committee have been enabled by strict economy in the ordinary expenses of maintenance to deal with several matters of importance. Last year the lower part of the building was painted and cleaned throughout, and during this year the second part of

the Institution, the Museum and Corridors, have been repainted and decorated at a cost of £67. Lighter tints have been chosen, and the Museum and its approaches are hence much more bright and cheerful. Next year the Committee hope to deal with the Library in the same way. The whole of the roof has also been thoroughly overhauled and made watertight, and the glazing has all been re-puttied and perfectly repaired. Additional locks have been put on the Museum cases, and the electric communications about the building remodelled and put into perfect working order. These matters have entailed considerable outlay, but the Committee are satisfied that the money has been well spent. The triangular piece of ground in the Strand which has long been an eyesore has also been asphalted and redrained. A purchase of specimens for the Museum from the collection of the late Rev. Urban Smith, of Stony Middleton, has absorbed £24, and lastly, the Committee have been enabled to add a second sum of £100 to the Sinking Fund they have formed for the repayment of the £500 they have had on loan since the foundation of the Institution. The Committee believe that although they have been enabled to take all these matters in hand, the efficiency and utility of the Institution have in no way suffered.

As usual, the Librarian's Annual Report to this Committee, which contains many statistics of interest, is appended. The Committee desire to add that the Institution was never in a better condition, or more highly appreciated than at the present time, and they feel that much of its prosperity is due to its present efficient management.

On behalf of the Committee,

WILLIAM HOBSON,

CHAIRMAN.

OCTOBER 30th, 1888.

*To the Chairman and Members of the Free
Library and Museum Committee.*

GENTLEMEN,

I have much pleasure in submitting to you my Third Annual Report.

The number of volumes in the Lending Library is 14227, against 13796 last year, and in the Reference Library 8,595 against 8184, or a total increase of 850 volumes, the number in both Libraries being now 23,022. The total issue in both Libraries shows a trifling decrease. In the Lending Library the issue is 130,314 against 131,641. This is more than accounted for by the gradual withdrawal of the three volume novels, which formerly held such an important position in our stock of works of fiction. In the Reference Library the numbers are 27,917, against 28,070. Eight books have been lost and paid for, and three have been totally lost through default of both borrower and guarantor. The books rebound and repaired number 3,545, nearly all with the exception of the magazines being done on our own premises. About 3,000 of the number have been either resewn or entirely rebound. 141 books have been withdrawn as worn out. It gives me much pleasure to again report that as a whole the books are carefully used, and fewer cases than ever of wanton damage have come under my notice this year. The Library is now in a good state of repair, and fewer books await mending than is usual at this time of the year.

The musical department quite justifies our belief in its usefulness. This is shown by the fact that the issues number about 30 in the week, and about 1,500 during the year. I have been often asked as to the popularity of the newer works of fiction as compared with the older standard works. I have been making careful comparisons as to the number of issues, and I am gratified to find that "Ivanhoe" and "David Copperfield" are out in circulation quite as much as "Aurora Floyd" and "East Lynne," and that "John Halifax" and "Adam Bede" show up quite as well as "She," "King Solomon's Mines," or "Treasure Island." The interest in the former books is abiding, that in the latter evanescent.

The News Rooms are more fully attended than ever, and the conduct of those that visit them is all that one could wish or expect. I have had no serious complaint to make during the past year

The re-arrangement of the minerals in the Museum is now practically completed, and the collection will be fully labelled and in order in the course of a few weeks. Mr. A. H. Stokes, F.G.S., and Mr. Arnold Benrose, M.A., who have kindly undertaken this work, and to whom I owe a deep debt of gratitude, have had their labours considerably prolonged by the arrangement of the important purchases made from Mrs. Urban Smith in March last. I think that when finally arranged, our collection will fully hold its own with that of other provincial Museums.

The numbers visiting the Institution were carefully counted during three separate weeks in February and March last. The highest week was 13,816, and the lowest 13,215, the average being 13,423, thus distributed :

Lending Library	3330
News Room	5330
Reference Room	3013
Ladies' Room	731
Museum...	1019
					<hr/>
					13423

The busiest day in the Reading Rooms is Monday ; in the Libraries and Museum, Saturday. These figures need no comment, showing as they do that the Institution, as a whole, is well used and highly appreciated. The figures for the year, on the same basis, would be something like 670,000, or about seven times the population of the borough.

I have again the greatest pleasure in testifying to the zeal and efficiency with which the whole of the staff discharge their duties. All the work, which is at times very heavy, is cheerfully done, and with a single eye to the good of the Institution and the service of the public.

The usual tables are appended to this report, to which I beg to refer all who require further information, and beg to remain, gentlemen,

Your obedient Servant,

W. CROWTHER,

Librarian and Curator.

OCTOBER 30th, 1888.

REPORT

OF THE

CORPORATION ART GALLERY COMMITTEE.

For the Year ending September 29th, 1888.

THE Art Gallery Committee have much pleasure in presenting their Sixth Annual Report. The past year has been one of steady progress, and the figures tend to show that the popularity and usefulness of the Gallery are both on the increase. The Gallery has been open during the past year on 272 days, of which 45 have been free. The attendance on the free days has been 16,331 (an average of 363 visitors daily), and the visitors by payment have numbered 17,492, giving a daily average of 77. The total number of visitors for the year has been 33,823 against 30,150 last year. A glance at the subjoined tables will give a good idea of the progress being made, it being borne in mind that the dates of opening and closing the Exhibitions do not correspond with the beginning and ending of the year.

1887-8.				RECEIPTS.		
VISITORS.				£	s.	d.
	Pay.	Free.	Total.			
Autumn Exhibition ...	7821	6420	14241	...	61	2 10
Spring " ...	6018	4680	10698	...	50	5 10
Summer " ...	4563	5580	10143	...	23	7 11
Totals ...	18402	16680	35082	...	134	16 7

All the figures tend to show that the free day is much and increasingly appreciated, while the visitors by payment show no falling-off

The deficiency in the Funds keeps at about the same low figure as last year, amounting to £209, as against £195, the difference being accounted for by the amount of insurance which had to be effected on the valuable loan collection now in the Gallery. The Committee are glad to find that their estimate as to the annual cost is thus justified, and think that the efficient maintenance of such a valuable institution at so small a cost is matter for congratulation. They can only re-affirm their hope that the time may soon come when the privilege of free admission may be further extended.

The Autumn Exhibition last year was open from September 7th to January 14th. The Art Union, in connection with it, was well supported, and the picture sales amounted to £146.

The Spring Exhibition extended from January 31st to May 7th. Its main attraction was the fine collection of modern pictures lent to the Committee by Sharpley Bainbridge, Esq., J.P. of Lincoln. This collection numbers 101 examples, being particularly rich in the works of Birket Foster and George Clausen, and containing good specimens of the work of L. Alma-Tadema, R.A., E. J. Poynter, R.A., W. Q. Orchardson, R.A., R. W. Macbeth, A.R.A., Ernest Crofts, A.R.A., and many other eminent artists. The Committee thankfully acknowledge the great kindness of Mr. Bainbridge in lending this collection, which has been of inestimable value to Art students, and of great interest to the general public. Local and London artists were also well represented in the Spring Exhibition. Mr. John M. Cook kindly lent a good "Wright of Derby," and Mr. Crosland, of Nottingham, good examples of DeWint and Logsdail. The picture sales amounted to £204 6s.

The Summer Exhibition, open from May 19th to September 6th, was on different lines from any of its predecessors. Its principal feature was a collection of works in Black and White. Many eminent artists contributed both drawings and etchings, and the proprietors of the "Illustrated London News" and the "Graphic," and Messrs. Cassell and Co., lent some of the valuable original drawings from their establishments. Mr. Councillor Dean and Dr. Fletcher also lent valuable examples. The Exhibition excited considerable interest, and was well patronised.

The Autumn Exhibition, now being held, was opened on September 17th by a *conversazione*, given by His Worship the Mayor (Mr. Alderman Newbold, J.P.), at which about 550 invited

guests assembled, and passed a very pleasant evening. The Committee's best thanks are due to His Worship for the kindly interest thus shown in the Art Gallery. The present collection is the most numerous ever exhibited in the Gallery, and the number of visitors is quite satisfactory.

The Third Series of Popular Concerts, arranged by the Curator, were held on the Saturday evenings of last winter. Twenty-four concerts were given, attended by 5400 persons. The total receipts were £61 16s. 3d., and the expenses £17 13s. 3d., leaving a clear profit of £43 13s. The best thanks of the Committee are due to the Curator, and to all those ladies and gentlemen who kindly gave him their assistance.

The Water-colour Room has now been boarded round, and the work of picture hanging thereby much facilitated. Nothing else of importance has been done or has been required in the building, which is in a state of good repair.

Sir Philip Cunliffe Owen paid an official visit to the Gallery on March 6th, and expressed his complete satisfaction with what he saw. He was met by His Worship the Mayor, and by the Chairmen and many of the members of the Free Library and Art Gallery Committees.

The usual change of examples in the four cases now filled from South Kensington Museum was made early in December last, and the Committee are indebted to the following gentlemen for the loan of objects of interest during the past year: Mr. Alderman H. H. Bemrose, J.P., for collection of ancient manuscripts and printed books; Mr. W. Bemrose, J.P., for collection of Indian metal work; Mr. Councillor George Bottomley for collection of China; Mr. R. G. Lomas for specimens of Derbyshire spar and marble manufactures, including works of art manufactured for Lord Scarsdale, Canon Olivier, and Mr. F. J. Robinson, and exhibited by their permission; Mr. Maw, of Tenant Street, for collection of Derby china, and Mr. W. H. Willett, of Brighton, for Burmese curiosities.

On behalf of the Committee

W. BEMROSE,

CHAIRMAN.

OCTOBER 30th, 1888.

EIGHTEENTH ANNUAL REPORT

OF THE

Free Library and Museum Committee,

For the Year ending Sept. 28th, 1889.

THE Free Library and Museum Committee have much pleasure in presenting their Eighteenth Annual Report, and, in doing so, beg to congratulate the Council on the continued usefulness and prosperity of the Institution.

There is nothing startling to chronicle respecting the last year's history of the Library and Museum. The Institution stands as high as ever in public estimation, and its efficiency in all its branches has been fully maintained. A larger sum of money than usual has been spent by the Book Committee, no fewer than 1,647 new books having been purchased. Of these 798 are replacements and 849 are entirely new. To the vigilant care and discretion of the Book Committee is due the general high character of the Library.

The remaining portion of the cleaning and painting of the Building, viz., the interior of the Library, has been completed during the present summer, and the work has been very successfully carried out. The original design has been adhered to, and there has only been a slight change in the colours. No great expense will need to be incurred under this head for several years to come. The building throughout is in a good state of repair, and the only matter which will demand the attention of the Committee in the near future is the re-arrangement, if necessary, of the heating apparatus.

A reference to the accounts attached to this Report will show how the income of the Committee has been expended. They believe that the

Institution has been very economically worked without impairing its usefulness in any way, and they are glad to say that they have added a third sum of £100 to the Sinking Fund formed for the repayment of the £500 which was borrowed at the foundation of the Institution. A sum of £57 12s. 9d. is carried forward to the next year's account, but of this £30 has been applied to the purposes of the Museum Committee, although not yet expended.

The Committee beg to refer all those interested in the inner working of the Institution to the Librarian's Report and the exhaustive statistics appended to it, and they desire to place on record their complete satisfaction with the way in which the work of the Institution is carried on.

In conclusion, they gratefully acknowledge the many tokens of interest shown in the Institution as evidenced by the donations of books and other things which are constantly being received. They beg to reiterate the opinion that the Library and Museum are doing excellent work—worthy of comparison with what is being done in other towns, and which in every way carries out the design of the revered founder.

On behalf of the Committee,

WILLIAM HOBSON,

CHAIRMAN.

November 4th, 1889.

*To the Chairman and Members of the Free
Library and Museum Committee.*

GENTLEMEN,

It gives me great pleasure to submit to you my Fourth Annual Report.

The total number of books now in the Lending Library is 14,836 against 14,227 last year, and in the Reference Library 8,825 against 8,595. This gives as the total in both Libraries 23,661, an increase of 839 on last year's total, and this in spite of 801 volumes having been withdrawn from circulation as worn out. The total issues in each Department show a decrease, which in the Lending Library amounts to 5,758 volumes, and in the Reference Library to 4,695. The causes for this are various. The gradual elimination of the three volume novel counts for much; the fact that many of the pictorial volumes so much in demand are hopelessly worn out is another cause; but, in my opinion, the chief causes are that in the Lending Library books are kept longer than formerly, and changes are less frequent, which I hope points to more thorough, and less desultory reading; while the readers in both Libraries are undoubtedly diminished by the fact that better times have decreased the numbers of the unemployed, and there is less time for reading. The state of the News Rooms just now in the day time is a remarkable contrast to what it was this time last year. The issues in the two Departments are as follows: Lending, 124,556; Reference, 23,222; together 147,778. As a matter of interest, it may be stated that the total issue of books since the foundation of the Library is—Lending, 2,488,218; Reference, 331,880, making together the astounding total of 2,820,098. The daily issue in the Lending Department during the past year varies considerably, ranging from 599 in the month of March to 338 in July, the highest daily issue being on April 18th, when 1,148 volumes were given out. The Reference Library varies in the same way, November standing at the head with a daily issue of 126, and June only showing a daily average of 35.

In the Lending Department 771 volumes have been withdrawn as worn out. The whole list of books so withdrawn for several years past has been carefully gone over by the Book Committee, and as a result 798 volumes have been replaced, the remainder being struck off the list and their places declared vacant. In addition to this, 589 new volumes have been purchased. These include the most recent and interesting works in Biography and Travels, and a large proportion of good, healthy juvenile literature. When a new Catalogue is undertaken, it will be seen that

books for the young hold an important place in the Library. Four books have been lost and paid for, and three have been totally lost through default of both borrower and guarantor. On the other hand, a book returned two years ago as totally lost, has been recovered. I think that considering the very large issue, these figures will not be considered unsatisfactory. There is very little ill-usage of books to complain of, and I have only had one case of deliberately wilful damage to report during the year. Four leaves were cut out bodily from a volume of humorous songs. A few of our readers, and only a few, are in the habit of marking the books. The marks consist chiefly of marginal notes, more or less idiotic, on the subject matter, and sometimes the reader's opinion on the volume as a whole is given in a condensed form on the fly leaf at the end. As might be expected, the remarks bear no critical value, and the practice is a distinctly mischievous one, and a violation of the Library regulations. I am informed that the practice is not unknown in Libraries other than those supported by the rates, and I have every reason to believe that we have less of it than in other towns. I hope I may be able next year to report its discontinuance. In the Reference Library 30 volumes of Illustrated books have been withdrawn as worn out, and 260 new volumes have been added. The whole of the Library is now in an excellent state of repair, and there are less than a hundred volumes not available for public use. The total number of volumes rebound during the past year is 945, and of those repaired 4,777, a total of 5,722.

During the last year there have been enrolled 1,062 new borrowers, 754 males and 308 females, whose occupations are shown in Table VI. They are thus distributed in the various Wards: Arboretum 116, Babington 141, Becket 228, Castle 98, Derwent 39, Friar Gate 121, King's Mead 126, Litchurch, 131. Calculating by the percentage which the number on the Burgess-roll in each Ward bears to the whole of the town, these numbers should be: Arboretum 144, Babington 123, Becket 187, Castle 126, Derwent 67, Friar Gate 111, King's Mead 150, Litchurch 92. These figures speak for themselves. The number of borrowers since the opening of the building in 1879 is 16,002, of whom I estimate something over one third are using the Library at the present time. 1,327 applications have been made to borrowers for overdue books, and no fewer than 1,005 books have been bespoken at the cost of one penny, a post card being sent to the borrower when the book is in. I shall be very glad to see this regulation still more largely used by borrowers.

Since February last, we have received regularly every week a list of the infected houses in the Borough. Occupiers of such houses known to be

borrowers, have received notice at once that their books must not be returned till the houses have been disinfected, and in every case the book has been destroyed on its return to the Library. The public may therefore have confidence that the Library does nothing in spreading contagious diseases. I have to acknowledge gratefully the ready co-operation of the Sanitary Committee, and the great assistance I have received from the Medical Officer of Health for the Borough (W. Iliffe, Esq.) and the Sanitary Inspector, Mr. Wilkinson.

The News Room and Reference Room continue to be much used, and in the evenings are often uncomfortably full. Monday and Saturday are the busiest days. The behaviour of those who come to read has been exemplary, and I have much pleasure in noting the fact that there seems every disposition to conform to the regulations in force for securing good order and perfect quiet. The only unpleasant circumstance to report during the year is the undetected theft of two magazines.

The re-arrangement and labelling of the Minerals in the Museum was completed last December, and a complete Catalogue of the collection has since been compiled by Mr. H. Arnold Bemrose, M.A., and is now available to the general public at a small cost. The Fossils are in process of re-arrangement, and will, it is hoped, be finished by the end of the present year. The re-arrangement of the Shells necessitated by the large additions made last year is practically completed now, and the labelling is in a forward condition. A valuable collection of British Birds' Eggs has been purchased, and the Museum Committee have had funds placed at their disposal for the purchase of Geological specimens which may be found wanting as the re-arrangement progresses. I hope soon to be able to report the Museum in perfect order.

I am again glad to express my complete satisfaction with the work done by the staff of the Institution. Both the junior assistants have left since my last Report, taking with them an excellent character for industry, and those appointed in their places are doing their work well. The work done by the other members of the staff is of the same high quality which has characterised their many previous years of faithful service. I should like also to place on record my sense of the high service which is rendered by the entire newspaper press of Derby, and thankfully acknowledge its hearty co-operation in all that tends to the welfare of the Institution.

The usual Tables are appended to this Report, to which I beg to refer all who require more detailed information, and beg to remain, Gentlemen,

Yours obediently,

W. CROWTHER,

Librarian and Curator.

November 4th, 1889.

SEVENTH ANNUAL REPORT

OF THE

Corporation Art Gallery Committee,

For the Year ending Sept. 28th, 1889.

THE Art Gallery Committee have much pleasure in presenting their Seventh Annual Report. The Gallery has been open on 263 days, of which 45 have been free. The attendance on the free days has been 13,847, with a daily average of 308, and visitors by payment have numbered 14,112, with a daily average of 65. The total visitors for the year have been 27,959. The highest attendance on a pay day was 423, the day of our most numerously attended concert, and the highest attendance on a free day was 1,052, on Dec. 26th.

The Committee's estimate as to the annual cost of the Gallery is again justified by the facts, the deficiency amounting to £202, as against £209 last year. Little or nothing has been required in the way of repairs to the building, and the establishment charges have been kept down to the lowest figure compatible with efficiency of management. The Sales of Pictures this year amount to £363 14s. od., as against £350 6s. od. last year.

The Autumn Exhibition last year opened on Sept. 19th, and closed on Jan. 25th. It was visited by 13,095 persons. The Art Union in connection with it was well supported, and yielded £88 16s. as against £76 1s.

The Spring Exhibition lasted from Feb. 9th to May 25th, and was visited by 7,990 persons. It was of a rather higher character than usual, several important London artists contributing pictures; and the Committee are further indebted to Mr. Councillor Clemson, Mr. T. C. Simmonds, Mr. W. Seth Smith, and Mr. E. Crosland (of Nottingham) for the loan of interesting pictures. The President and Council of the Royal Academy also lent Waterlow's picture "Galway Gossips" from the Chantrey Bequest Pictures.

The Summer Exhibition this year consisted of Photographs. Many of the best Photographic Artists in the kingdom exhibited, and the Exhibition which lasted ten weeks, from June 10th to Aug. 20th, was visited by 6,874 persons. Mr. W. England, of London, and Mr. H. J. Whitlock of Birmingham, were again the Judges, and their awards gave general satisfaction.

The Autumn Exhibition now on view in the Gallery was opened on Sept. 18th, when His Worship the Mayor (Mr. Councillor Woodiwiss, J.P.) gave a *Conversazione* at which about 600 guests were present, who much appreciated his kindly hospitality. The gathering was a great success, and

the best thanks of the Committee are due to His Worship for the interest he has always shown in the prosperity of the Art Gallery. The number of pictures exhibited is rather less than last year, but there is no falling off in quality or in public interest, 4,668 persons having visited the Gallery during the first five weeks, and eleven pictures of the value of £151 having already been sold.

The fourth series of Popular Concerts took place on the Saturday evenings of last winter. They were attended by 4,084 persons, who paid £54 2s. for admission. The net cost of the series was £23 18s., so that they yielded a profit of £30 4s. The concerts were not so numerous attended on the whole as in the previous year. Their success has led to the organisation of concerts similar in character in other places on the same evenings. The best thanks of the Committee are due to the Curator for his trouble in organising and arranging these pleasant evenings, and to all those ladies and gentlemen, too numerous to mention, who have given their services.

The usual change of objects in the South Kensington cases was effected in December last: they are of a highly attractive character, and such as are likely to be a valuable aid to the art and industry of the town. Through the good offices of Sir Philip Cunliffe Owen, an additional case has been filled with early Cyprian pottery and glass, and the fine collection of Chinese and Japanese objects belonging to Lady Hart, which was for some time on view at South Kensington Museum, has by her Ladyship's kindness been transferred to our Gallery. The thanks of the Committee are also due to Mr. W. Bemrose, J.P., for his loan collection of Indian metal work; to the Rev. T. R. Stevenson, of Shanghai, for his Indian and Cingalese curiosities; to Canon Olivier and Mr. F. J. Robinson for their Derbyshire vases; to Mr. and Mrs. Maw, of Tenant Street, for their specimens of Derby China; and last, but not least, to Mr. Felix Joseph, of Brighton, for the loan of a portion of his matchless collection of Wedgwood ware.

In conclusion, the Committee think that the town may be congratulated on the increasing interest which is being manifested in art, to which the Art Gallery cannot have failed to contribute. They are glad to note its increasing usefulness and popularity, and the small cost to the town at which it is maintained; and they will rejoice when they feel they are in a financial position largely to extend its educational benefits, by throwing it entirely open.

On behalf of the Committee,

WM. BEMROSE,

CHAIRMAN.

Nov. 4th, 1889.

BOROUGH OF DERBY.

NINETEENTH ANNUAL REPORT

OF THE

Free Library and Museum Committee,*For the Year ending September 29th, 1890.*

THE Free Library and Museum Committee have great pleasure in presenting their Nineteenth Annual Report, and, in doing so, congratulate the Council on the completion of another year of usefulness and prosperity.

There is nothing special to report concerning the history of the Library and Museum during the year just closed, the aim of the Committee having been rather to perfect the work of the Institution on its present lines than to initiate anything new or startling. The work has gone steadily forward, and everything has been kept up to date, the Committee having expended a very large sum on New Books. 1,520 new works have been added, of which 1,180 are entirely new, and 340 are replacements. 322 of these have been placed in the Reference Department, many of them very valuable; and the Book Committee have taken special care that books on scientific subjects should contain the results of the most modern research.

The Building is in a good state of repair, and no painting or cleaning has been necessary in any part. The Heating apparatus has been thoroughly overhauled and re-modelled, and when a few minor matters have been attended to, will be a very great improvement on that hitherto existing. The Lighting in the corridor and delivery room has been much improved, and the Committee are now turning their attention to improving the light in the reading rooms by means of reflectors. They will be very glad when the time arrives for introducing

the Electric Light at a moderate cost, thereby securing a purer atmosphere and less destruction of the bindings of the books, as well as a better light.

Reference to the subjoined accounts will show how the income of the Library has been expended. The establishment charges have been kept as low as efficient working permits ; a fourth instalment of £100 has been added to the sinking fund formed for the extinction of the debt of £500 incurred when the Institution was founded ; and when all the money voted to the Book Committee has been expended, a sum of £505 will have been spent on the Library proper, against £373 last year. The £90 which the alterations to the heating apparatus was estimated to cost has been kept in hand because the contract was not quite completed.

The Report of the Chief Librarian, and the complete statistical information appended to it, fully supply any additional information which may be required concerning the working of the Institution ; and the Committee have much pleasure in recording their complete satisfaction with the way in which the entire staff carry out that work.

The Committee desire, in conclusion, gratefully to acknowledge the many valuable donations made during the past year, and to express once more the opinion that the Public Library and Museum are doing their excellent work thoroughly and economically, and with incalculable benefit to the community at large.

On behalf of the Committee,

WILLIAM HOBSON,

CHAIRMAN.

October 30th, 1890.

*To the Chairman and Members of the Derby Free
Library and Museum Committee.*

GENTLEMEN,

I have much pleasure in submitting to you my Fifth Annual Report.

The Lending Library now contains 15,594 books, against 14,836 last year, and the issues have amounted to 129,269, against 124,556. The average daily issue is six lower than last year, but taking into account the gradual withdrawal of three volume novels, and the substitution of books in one volume, there is rather an increase than a decrease in the *works* issued. The Reference Library stock now numbers 9,079 volumes, against 8,825 last year, but the total issue has fallen from 23,222 to 17,380, and the average daily issue from 84 to 59. This is entirely accounted for by the withdrawal of all the worn-out bound volumes of the *Illustrated London News* and *Graphic*, the issues of which were counted in the Reference Library returns. There is no serious diminution in the numbers of those who consult the more important portions of the Reference Department. The daily average issue in the Lending Department varies from 566 in April to 373 in July, and in the Reference Department from 80 in October to 39 in May and July.

In the Lending Library 427 volumes have been withdrawn as worn out: of these 340 have been replaced. The places of some have been declared vacant, and others will be re-purchased as opportunity arises. Nine volumes have been lost and paid for, and four totally lost. The new books amount to 858, which include the most recent works in science, biography, and travels; and plenty of good, healthy reading for boys and girls. The additions to the Reference Library number 322 volumes, and include some of the most valuable works of the day.

A new Supplementary Catalogue has been prepared during the past year, and was issued to the public in August last. It deals with about 4,700 volumes. A glance at this will show the character of all the books added in recent years, and bear eloquent testimony to the

care exercised by the Book Committee. A Catalogue of the "Devonshire" Library of local books, which has hitherto only existed in manuscript, is in active preparation, and will form an interesting and valuable addition.

I am again able to report favourably on the way the books are used; and there has been considerable improvement in many respects. We still occasionally meet with stupid marginal notes, more often reflecting the vacuity of the reader's mind than an intelligent understanding of the text; but in this matter there is a marked improvement. I am still forced to believe that all readers do not use the books with perfectly clean hands, and certain unmistakable signs show that the habit of reading at meals has not altogether died out; but on the whole there is very little to complain of. Among damaged books, we have had during the past year one which had been soaked in a bucket of water, one burnt through with cigar ash, and one worried by a dog. It is only fair to add, that in all these cases the damage was cheerfully paid for by the borrower. I believe that most of the borrowers fully appreciate the value of the Library, and exercise all reasonable care in the treatment of the books. One very gratifying feature during the past year is the marked decline in the number of overdue books which had to be written for. The number of books bespoken by the payment of one penny has increased from 1,005 to 1,204.

In Table VII. the annual turnover of each volume in the Library is given as 8·3. This is somewhat misleading, as very many books seldom or ever go out, and with books really in active use the turnover is much greater. It will be interesting from several points of view to notice the circulation of the following typical books during the past year, each selected as a good representative of its class:—

	COPIES.		TIMES.	
{ Sir W. Scott—"Ivanhoe"	3	...	105
{ Charles Dickens—"David Copperfield"	4	...	111
{ W. M. Thackeray—"Vanity Fair"	2	...	78
{ Edna Lyall—"Donovan"	3	...	122
{ Mrs. H. Ward—"Robert Elsmere"	3	...	118
{ F. M. Crawford—"Saracinesca"	3	...	114
{ Mrs. H. Wood—"The Channings"	5	...	130
{ Miss Worboise—"Overdale"	3	...	120
{ G. A. Henty—"A Final Reckoning"	2	...	120
{ Jules Verne—"Abandoned"	3	...	122

These figures speak for themselves.

During the period which has elapsed since my last report, 1,168

new borrowers have been enrolled, 757 males and 411 females, whose occupations I have tabulated as usual. The borrowers are distributed over the various wards as follows, the second column showing the number who ought to come from each ward in proportion to the population.

WARD.	Actual number of Borrowers.	Number according to Population.
Arboretum	113	150
Babington	140	125
Becket	214	186
Castle	99	123
Derwent	47	65
Friar Gate	121	111
Kings Mead	121	150
Litchurch	145	90

Becket, Babington, Friar Gate, and Litchurch Wards furnish more than their quota of readers, the last-named remarkably so, and the other four wards fall below their fair share.

The arrangement referred to in my last report with regard to infected houses is still carried out, and works well. All books which have been in infected houses have been destroyed, and the public may have all confidence that the Library is not a means of spreading contagious diseases.

The News Room and Reference Room continue to be extensively used, and no complaint can be made of the conduct of those who resort thither. In the evenings the News Rooms are always full, and I have very rarely indeed to draw attention to the regulations enforcing silence.

I have not been able to do nearly as much in the Museum as I hoped to have done during the year; but, with the exception of the Geological collection, everything is in good order. The naming of the specimens is all but completed, and if I can only get time, a few weeks should see everything in order. The Committee may rely on my best efforts in this direction.

Mr. C. J. Courtney, who had been in the service of the Committee for nearly eighteen years, received the appointment of Librarian at the Minet Library, Camberwell, in May last. His services were always cheerfully and willingly rendered; and the appointment of Mr. W. H. Walton, as his successor, will, I am sure, secure the Committee another zealous and faithful servant. Of the rest of the staff, I can only speak

in the same high terms as it has been my pleasure to use in past years. I have to repeat my thanks for the kindly interest always shown by the local Press in all that tends to the welfare of the Institution; and, lastly, to express the deep obligation under which I am to the Chairman and every other Member of the Committee for their hearty co-operation and kindly sympathy with me in every department of my work.

The usual tables will be found following this report, in which fully detailed information as to the working of the Library will be found. Some few additional particulars have been given in conformity with the recommendations of the Library Association of the United Kingdom.

I remain, Gentlemen,

Yours obediently,

W. CROWTHER,

LIBRARIAN AND CURATOR.

October 30th, 1890.

EIGHTH ANNUAL REPORT

OF THE

Corporation Art Gallery Committee.

THE Art Gallery Committee have great pleasure in presenting their Eighth Annual Report. The Gallery has been open on 249 days, and the attendance compares with that of last year as shown in the following table:—

	1888-9.	1889-90.
Visitors to Autumn Exhibition	13095	12776
„ Spring „	7990	12540
„ Summer „	6874	5958
Total Visitors	27959	31274
Total Days Open by Payment	217	206
„ „ Free	45	43
Total Days Open	262	249
Average on Paying Days	65	70·7
„ Free Days	307·7	388·5

It will be seen from the above that the number of visitors exceeded those of last year by 3315, although the Exhibition was open 13 days less, while the average daily attendance has also increased—that on the free day by 25 per cent. The highest daily attendance when admission was by payment was on May 26th, Whit-Monday—449; and the highest on a free day was on Whit-Tuesday, when 1267 visitors attended. Other popular holidays ran these numbers very close.

The Committee regret to report an increase in the sum required to meet the deficiency as compared with several previous years; but various reasons have contributed to this. Necessary repairs and alterations have absorbed nearly £40, as against £2 last year; and three exhibitions have been collected and despatched from London, instead of two. The Committee have exercised every possible economy compatible with the efficient carrying on of the Gallery, which is proving itself year by year more popular, and of greater use to the ratepayers. The picture sales during the year reached the sum of £714 1s. 6d., against £363 14s. last year.

The Art Union in connection with the last Autumn Exhibition was a great success, realising £110, against £88 16s. last year. The Committee intend having an Art Union again this year.

The Spring Exhibition was one of exceptional merit, as a few attractive pictures by prominent London artists were again added to the usual local exhibits. The President and Council of the Royal Academy lent Professor Herkomer's picture of the "Chapel of the Charterhouse," which was a very great attraction.

The Summer Exhibition consisted of works in black and white. Beside those coming direct from the artists, the Committee were indebted to the following gentlemen for valuable contributions:—The Proprietors of the *Graphic* and *Art Journal*, Messrs. Boussod, Valadon, & Co., Messrs. Cassell & Co., Messrs. H. Graves & Co., and Mr. J. P. Mendoza. These loans were locally supplemented by pictures kindly lent by Messrs. A. O. Deacon, H. Gregory, G. Holme, Jun., F. J. Robinson, and W. W. Winter. The result was a very attractive Exhibition.

The Autumn Exhibition now on view was opened on September 15th. His Worship the Mayor (Mr. Councillor Heathcote, J.P.) gave the customary *Conversazione* on October 29th, when about six hundred guests assembled. The gathering was a most successful one, and the Committee's best thanks are due to the Mayor for the kindly interest taken in the Institution. The present Exhibition already outstrips all its predecessors in the numbers visiting it, over 7,000 having already passed the turnstiles.

The objects on loan from South Kensington were changed in December last. The Museum authorities showed, as usual, their ready inclination to meet the wishes of the Committee as to the class of objects sent, and beside a case of beautiful electrotypes, have sent woodcarvings, wrought iron work, Oriental tiles, and specimens of lace. These have all been of great value, and have been made the fullest use of by the students of the School of Art and others for copying purposes.

The fifth annual series of Saturday Evening Concerts consisted of 15 concerts only, but these were well attended, and created the usual interest. 2369 persons attended, who paid £29 6s. 3d. for admission. The expense attending the concerts was £13 13s. 6d., so that they yielded a profit of £15 12s. 9d. The Curator, and all those ladies and gentlemen who so kindly assisted him in organising and carrying these pleasant evenings to a successful issue, deserve the best thanks of the Committee.

The Committee, through the lamented death of Mr. Joseph Courtney, in February last, lost a faithful servant. He had been gate attendant at the Art Gallery since its foundation, and his fidelity and zeal in the service of the Committee were beyond all praise. The Committee believe they have been fortunate in securing the services of Sergeant W. Johnson as his successor.

While the steady progress of the Gallery from year to year is matter for congratulation, there is one matter connected with its past year's history which it gives the Committee special pleasure to report, and on which the Council and the town at large are to be specially felicitated; and that is the splendid series of gifts of Derby china from Mr. Felix Joseph. This gentleman, whose name has long been famous in the art world, and who is specially distinguished in the Midlands for his handsome gifts and loans to the Castle Museum, at Nottingham, happened to come to Derby in the September of last year, and paid a visit to the Art Gallery. He was so pleased with what he saw there, that, although entirely unconnected with the town by family or business ties, he formed the resolution of presenting to the Gallery what he saw it stood in need of—a typical collection of Derby china. He immediately set to work collecting, and so well has he succeeded, that his gift now numbers some 350 specimens, covering the whole period of manufacture, and well illustrating the art objects made at the Derby works. The collection is specially rich in figures, both in biscuit and coloured, and the generous donor still continues to add to it almost daily. The heartiest thanks of the Committee, the Council, and the Ratepayers at large are due to Mr. Felix Joseph for this magnificent and valuable gift to the town, and the Committee venture to express the hope that his example may stimulate others to similar generosity in helping a popular institution.

In conclusion, the Committee desire to point out that they believe the Art Gallery is as steadily advancing in public usefulness as it is in public favour, and they will be very glad indeed for the time to arrive when the institution can be entirely free, and the ratepayers reap its full benefit. In the meantime, the Council may rest assured that the Committee will do their utmost to carry on the good work the Art Gallery is doing at the lowest possible cost compatible with thorough efficiency.

On behalf of the Committee,

WM. BEMROSE,

October 30th, 1890.

CHAIRMAN,

HALL, Mr. SAMUEL—Framed Specimen of Penmanship; Fossil, Stigmaria from Bull Bridge.

HIGGINS, Rev. V. G.—Stuffed Fox in case.

HOLMES, Mr. (Brailsford)—Water Rail.

LINGARD, Dr. ALFRED—Five Frames containing Pictures of Types of African Negro Races; and Collection of Skulls, including those of the Gorilla, Orang-otang, Baboon, Turtle, etc.

ONIONS, Mrs.—Skulls of Horse, Dog, and Baboon.

PAINTER, Rev. W. H.—Specimens for Herbarium.

PYWELL, Mr. W. H.—Two Zulu Shields and Assegais.

SPENCER, Mr. ANTILL, Jun.—Albatross.

WAINWRIGHT, Mr. J. W.—Collection of Specimens of Wood.

WEBB, Mr. H. G.—Banded Snake, Beetles, etc., from Baden Park, Ivanhoe, New South Wales.

Art Gallery.

THE "FELIX JOSEPH" GIFT.—A list of the magnificent collection of Crown Derby China, presented by Mr. Felix Joseph to the Gallery during the past year, and which already numbers 350 specimens, will shortly be issued in Catalogue form. The Chairman of the Art Gallery, Mr. W. Bemrose, J.P., has kindly undertaken this work, and it will be published as soon as possible. No mere list, without dates and full particulars, could do this splendid gift full justice.

HARDWICKE, Mr. H. J., M.D.—*Rambles Abroad*.

HOESON, Mr. Ald., J.P.—*Painter's Flora of Derbyshire*; *Agricultural Grasses*; *Farming World Year Book*; *Live Stock Journal Almanac*; *Greenwood's Public Libraries*; *Fream's Soils and their Properties*.

TWENTIETH ANNUAL REPORT

OF THE

Free Library and Museum Committee,

For the Year ended Sept. 30th, 1891.

THE Free Library and Museum Committee present their Twentieth Annual Report to the Town Council with very great pleasure, and are glad to be able to speak of the prosperity of the Institution under their charge as continuous and progressive.

The year just closed has not seen the inauguration of anything new in connection with the work of the Library and Museum, but the Committee have had steadily in view the important part the Institution plays in the intellectual life of the town, and have endeavoured to make its attractiveness and usefulness keep pace with the ever-growing requirements of the time. No fewer than 1,512 new books have been added to the Library, of which 1,136 are quite new, and 376 are replacements. Of the new books, 254 have been placed in the Reference department, many of them Scientific works of great value, and the addition of works bearing on Technical Education has not been lost sight of, and will be carefully looked after as time progresses.

The Committee are glad to report the Building to be in a good state of repair. No painting and cleaning have been necessary during the past year, except to the houses of the Librarian and Porter, but there have been several important items of expenditure. The remodelling of the Heating Apparatus at a cost of £90, remedied a very unsatisfactory state of things, and the building is now comfortably warmed throughout. The re-lighting of the Reading Room is responsible for a cost of £61, but the excellent result justifies the expense, and probably nothing better can be obtained

till it becomes possible to light the whole building with the electric light. The Committee will be very glad when that time arrives, so that the public may be able to read by a better light, in a purer atmosphere. The Committee will also then be able to devote much of the money now spent on cleaning and bookbinding to other objects of the Institution.

It will be noticed, on reference to the subjoined accounts, that the Committee have, during the past year, been able to set apart the last instalment of £100, towards the repayment of the £500, which was borrowed for special purposes when the Institution was founded. This is a matter for much congratulation, for the Committee are not only relieved of the debt, but have no longer to provide for the yearly interest. The establishment charges are about normal, and have been kept as low as is compatible with efficiency, the only important addition being the connection of the building with the National Telephone Exchange, which, beside being a great convenience, is an additional security in case of fire. When the amount voted to the Book Committee is all expended, nearly £600 will be found to have been devoted exclusively to the Library, a department which the Committee deem to be the most important of all they have in charge.

The Chief Librarian's report, and the exhaustive statistics which accompany it, will give any additional particulars which may be required as to the inner work of the Library. To the numerous donors whose generous gifts from time to time increase the value of the Institution, the Committee desire to tender their hearty thanks, and they wish once more to place on record their entire satisfaction with the way in which the various members of the staff discharge their duties. At their meeting this day, they took into consideration an application from the Chief Librarian, and unanimously resolved to raise his salary from £200 to £240 per annum.

On behalf of the Committee,

WILLIAM HOBSON,

CHAIRMAN.

November 2nd, 1891.

*To the Chairman and Members of the Derby
Free Library and Museum Committee.*

GENTLEMEN,

I have much pleasure in submitting to you my Sixth Annual Report.

The Lending Library now contains 16,160 books, against 15,594 last year, and the total issues have amounted to 133,594, against 129,269. The daily average has risen from 493 to 518. Of new books we have added 882, and we have also replaced 376 of the 669 volumes withdrawn as worn out. Fourteen volumes have been lost and paid for, four totally lost, and five books coming from infected houses have been destroyed. I can again report favourably as to the way in which, for the most part, the books are used, and considering the enormous circulation, and the fact that the readers, as shown in Table VI., come from all classes of the population, there is very little to complain of.

The Reference Library stock now amounts to 9,322 works against 9,079 last year, 254 books having been added, and 11 withdrawn as worn out. The issues amount to 13,520, against 17,380, and the daily average stands at 47 instead of 59. The reduction in these figures is occasioned by the temporary withdrawal of the bound volumes of illustrated magazines, and I am glad to report that there is no reduction in the numbers of those readers who consult the more valuable portions of the Library; but, on the contrary, a large increase of *students*, as opposed to those who come merely to look at pictures, or to pass an idle hour. The University of Cambridge has lent some of the more valuable books used as text books for the courses of University extension lectures, and we have added all the others necessary, and the text books kindly presented by the University Correspondence College are also very largely consulted. The new books added have all been carefully chosen, and include many of the most recent and valuable works on Science and Art.

The number of new borrowers added during the year is about normal, and the number of cards cancelled considerably less than the average. The number of overdue books which have had to be written for, again shows a gratifying diminution, and that the privilege of bespeaking books by the payment of one penny is appreciated is shown

by the fact that 1,004 books were so bespoken. Our Library stock now shows a percentage of 27.05 to the population, a proportion which compares very favourably with other towns, and the annual turnover of each volume is about the same as last year. I hope on some future occasion to lay before you the number of books in actual use, as there is no doubt that many books are so much dead weight on the shelves, and might fairly, having served their turn and got out of date, give way for others.

I follow the precedent of the last two years and show here in a table the districts from which the last thousand borrowers come:—

WARD.				Actual Number of Borrowers.	Number according to Population.
Arboretum...	117	155
Babington	145	126
Becket	233	183
Castle	65	120
Derwent	61	64
Friar Gate	152	113
King's Mead	112	150
Litchurch	115	89

The second column shows the number that might reasonably be expected per thousand according to proportion of householders. From this it will be seen that Babington, Becket, Friar Gate and Litchurch Wards again furnish considerably more than their share of readers, Derwent Ward is about normal, and the remaining Wards furnish less than their fair proportion, Castle Ward being remarkably low.

The News Rooms are more largely used than ever, and I have not had a single cause of complaint as to the behaviour of those who frequent them. Indeed, in every part of the Institution, the public show ready compliance with the rules, and I do not know of a single unpleasant circumstance arising from their enforcement. The average daily number of visitors to the building is not less than 1,500, and on Mondays, Fridays, and Saturdays, it is far more. The visitors for the year just closed fall little short of half a million.

The Museum is, I am sorry to say, still in an unfinished state. The Conchological collection has been arranged and labelled, and the

Geological collection has all been gone through and named by Mr. J. W. Carr, M.A., to whom my warmest personal thanks are due for much help and advice. Specimens wanted to complete a typical Palæontological collection have been purchased by the Committee, and the re-arrangement is being pushed on as rapidly as possible. My best efforts shall be given to its early completion.

The usual tables will be found appended to this Report, to which I beg to refer all those who wish for more detailed information.

It only remains for me to express my entire satisfaction with the way in which the various members of the Staff discharge their duties. No Institution could be better served. Of those who have been long in your service, I need only say that their zeal and fidelity are undiminished, and those more recently appointed are no less satisfactory. I desire again to recognise the valuable help given to the Institution by the entire Press of the town, and to once more express my own personal obligations to the Chairman and every member of the Committee for the ready help and co-operation I have always received in every department of my work.

I remain, Gentlemen,

Obediently yours,

W. CROWTHER,

LIBRARIAN AND CURATOR.

November 2nd, 1891.

NINTH ANNUAL REPORT

OF THE

Corporation Art Gallery Committee.

THE Art Gallery Committee have much pleasure in presenting their Ninth Annual Report. The Gallery has been open on 253 days, and the numbers attending, as compared with the two previous years are shown in the following table:—

	1888-9.	1889-90.	1890-91.
Visitors to Autumn Exhibition	13095	12776	15842
„ Spring „	7990	12540	30799
„ Summer „	6874	5958	10045
Total Visitors	27959	31274	56686
Total Days Open by Payment	217	206	209
„ „ Free	45	43	44
Total Days Open	262	249	253
Average on Paying Days	65	70·7	82·6
„ Free Days	307·7	388·5	477·7

The large numbers opposite the Spring Exhibition are accounted for by the fact, that some nineteen thousand persons passed the turnstiles during the four days on which the casket and addresses presented to Her Majesty the Queen were on view. These abnormally high numbers have been left out in calculating the daily averages, and excluding them from the total visitors, we should still have a grand total of 37,475, or some six thousand in advance of last year. The average daily attendance has also steadily increased, that on the free day by more than 20 per cent. The highest attendance on a free day was 10,696 on May 19th, and on a paying day, 3,914 on May 20th, on both of which days the Royal gifts were on view. Excluding these, the highest attendances were 838 on August 4th for a free day, and 373 on March 28th, when admission was by payment.

There is a small increase in the sum required to meet the deficiency this year, which is due to various causes. Painting and thoroughly cleaning the building have absorbed £45, and the medals for the Photographic Exhibition, £23, while the amount received as commission on picture sales is only £18 against £37. The establishment charges have varied but little, and the expenses connected with the organisation of the Exhibitions have been less. The picture sales realized £360, about the same as in 1889. The Committee have worked the Art Gallery as economically as possible, and think that its increasing popularity and usefulness may well be pleaded as a set-off against its small cost.

The Autumn Exhibition contained some admirable pictures, and the Art Union in connection with it realized £111 16s., rather more than the previous year.

In the Spring Exhibition, a new departure was made by the addition of a good collection of pictures by continental artists, which gave considerable interest to the Exhibition. In connection with this Exhibition, the Committee have again to acknowledge the kindness of Messrs. Henry Graves and Son, the eminent printsellers of Pall Mall, who lent a choice collection of original paintings from their well-known art treasures.

The Summer Exhibition consisted of Photographs. The collection was not a large one, but was very choice, some of the best artists in the kingdom exhibiting. It was a matter of much congratulation to the Committee, that our local artists, both professional and amateur, held their own well in a very keen competition, and secured some of the best awards. The thanks of the Committee are specially due to the distinguished men who gave their services as judges, Capt. W. de W. Abney, R.E., C.B., F.R.S. and W. England, Esq. A series of photographs of Derby children in fancy dress as they appeared at a ball given by the Mayor and Mayoress, added much interest to this Exhibition.

The Autumn Exhibition now in progress was opened on Sept. 15th, and bids fair to outrival in popularity all its predecessors. It has already been visited by 9,500 persons, and the sales of pictures reach £229. His Worship the Mayor (Sir Alfred Haslam, Kt., J.P.), gave the usual *Conversazione* on October 21st, when about a thousand guests accepted an invitation "to meet Mr. Felix Joseph." The gathering was an exceedingly pleasant one, and the Committee desire to thank his Worship both for this, and for many other tokens of the interest he has taken in the Institution.

The collection of objects lent by South Kensington Museum was changed as usual in December last. Suggestions made by your Committee as to the objects desirable for loans were as usual readily met by the Museum authorities, and the selection of textiles, leather-work, Oriental pottery, and electrotypes have proved very valuable to art students, who have made good use of their opportunities for studying and copying these fine examples, and applying the knowledge thus gained to the manufactures of the town.

The sixth series of Saturday Evening Concerts was given during last winter. Sixteen concerts were given between Nov. 1st and March 28th. They were attended by 2,482 persons, and cost about £12. The amount received in admission fees was £31 os. 6d., so that they yielded a profit of £19. The Committee's hearty thanks are due to the Curator, and to those ladies and gentlemen who so cheerfully give their services in providing these pleasant evenings, which already number 109, and have resulted in placing £160 to the credit of the Art Gallery funds.

Any report on the Art Gallery would be incomplete without a special reference to the continued liberality of Mr. Felix Joseph. Whereas last year we had to report that the collection so generously presented by him numbered about 350 specimens, we have to announce the receipt during the past year of more than a hundred additional specimens, the whole collection now numbering 452 pieces. It contains examples of every period of the manufacture, and specimens of almost every type of article made; and is in every sense what the generous donor intends, a typical collection of Derby ceramics. It will in course of time be completely and exhaustively labelled, so as to be of real value to the collector and the student of ceramic art, as well as interesting to the general public. The Corporation, on October 21st, in public meeting assembled, presented Mr. Joseph with an illuminated address, and a handsome vase, decorated with the Borough Arms and other emblems, and specially made by the Royal Crown Derby Works. The address was signed by the Mayor, the Chairman of the Library Committee, the Chairman, Vice-Chairman, and Curator of the Art Gallery. The meeting was a most successful one, His Worship the Mayor gave an admirable address, the formal vote of thanks to Mr. Joseph was moved by Mr. Alderman Hobson, J.P. and seconded by Mr. Alderman Sowter, J.P., and Mr. Joseph made a most genial and telling speech in response to the presentation. In the evening of the same day, Mr. Joseph attended the *Conversazione* already referred to. The Committee can only reiterate their hearty thanks to Mr. Joseph

for his magnificent gift, which he has promised to still further supplement as opportunity arises, and to again express the hope that his example may stimulate others to like acts of generosity in the cause of art.

In conclusion, the Committee think that the present state of the Art Gallery is matter for congratulation. It has for the last few years been steadily advancing in public estimation. The periodical Exhibitions stand well in the eyes of the art world, and the Institution is growing in usefulness and popularity in the town. Much of its success is owing to the well-directed exertions and zeal of the Curator, which the Committee are glad to take this opportunity of acknowledging. The Committee echo the expressed wish of Mr. Felix Joseph, and will be glad when the time comes for making the Gallery entirely free, and so open its benefits to a larger public, but until that time comes, they beg to assure the Council that no effort shall be wanting on their part to carry out the work of the Art Gallery efficiently, thoroughly, and economically.

On behalf of the Committee,

W. BEMROSE,

CHAIRMAN.

Nov. 2nd, 1891.

TWENTY-FIRST ANNUAL REPORT

OF THE

Free Library and Museum Committee,

For the Year ended September 30th, 1892.

THE Free Library and Museum Committee beg to present to the Town Council their Twenty-first Annual Report, and have much pleasure in doing so, believing that the Institution under their charge was never more prosperous than at present, and that its work is being successfully carried out.

The record of the books issued varies little from that of last year, but all details will be found in the Librarian's Report, and in the exhaustive tables appended to it. New books have been added freely in both Lending and Reference Departments, the additions numbering 843 in the Lending Library, and 342 in the Reference Department. In addition to these, 589 worn-out volumes have been replaced, so that the total additions to the Library during the year number 1774, and, when all the money voted to the Book Committee has been expended, a sum of about £700 will be found to have been appropriated to the expenses of the Library department, which the Committee consider to be the most important of those under their charge. The first portion of the Catalogue of the "Devonshire" Library has been published, and embraces all the printed books in that valuable collection, and the cataloguing of the pamphlets and prints is now being proceeded with. A supplementary Catalogue of 119 pages has also been published, which embraces a reprint of an earlier supplement, and also contains the names of about 2,200 books added to the Library since June, 1890.

The building is in a good state of repair. The news rooms and corridor have been thoroughly painted and cleaned during the summer, the work having been previously done in 1887. The Committee are very

glad to know that it will soon be possible to light the building by the electric light. They believe that much will be saved in re-painting and bookbinding, while both the staff and the public will be much the gainers, by increased purity of atmosphere, and better light. After the robbery of Jubilee coins, which unfortunately took place in May last, the Committee made a thorough examination of the building, and additional precautions for its safety were taken in the shape of extra locks, bars to all the windows, and the extension of the electric alarm system to the houses of the Curator and Porter. They believe that these precautions, in conjunction with the half-hourly visits of the police both day and night, have now rendered the building as secure as possible.

The buildings were used for a *Conversazione* by His Worship the Mayor, on Saturday, June 4th, when he welcomed the delegates to the A.M.C. of the Manchester Unity of Odd-fellows ; and once more proved their adaptability to such a purpose.

All those interested in the inner working of the Library will find much to interest them in the Librarian's Report and the tables which follow. The Committee desire to thank most heartily all the donors whose interest in the Institution is shown by their generous gifts, and they would specially thank those publishers who send periodical literature to the news rooms, either gratuitously, or at reduced rates. They are also glad to assure the Council of their complete satisfaction with the staff of the Institution, who they believe discharge their duties to the public with industry, tact, and courtesy.

On behalf of the Committee,

WILLIAM HOBSON,

CHAIRMAN.

November 1st, 1892.

*To the Chairman and Members of the Derby
Free Library and Museum Committee.*

GENTLEMEN,

The time has come round for me to submit to you my Seventh Annual Report, and I do so with very great pleasure.

The Lending Library now contains 16,958 books, against 16,160 last year, and the total issues are 134,763 against 133,594, while the daily average is 515 against 518. 843 new books have been added, and 589 volumes withdrawn as worn out have been replaced by new copies. Early in the year, the Book Committee went through the whole of the worn-out list from the stock book, re-ordering such books as they thought desirable, and declaring the numbers vacant where the books were out of date or without interest. Nineteen volumes have been lost and paid for, six totally lost, and five coming from infected houses have been destroyed. I can only repeat what I have said on previous occasions, that with very few exceptions, the books are carefully used, and considering the extent of the circulation, there is very little cause for complaint.

The Reference Library stock now includes 9,664 works, of which 342 have been added during the past year, and it has not been found necessary to withdraw any from circulation. The number added includes a large number of the volumes of Patent Specifications, and I would draw attention to the largely increased use of this Department. The daily average issue in the Reference Library is precisely the same as last year, indeed the year's work as a whole has been singularly like that of the preceding year. Great care has been exercised in the choice of the new books added, preference being given to those likely to be of service to *students* and to workmen employed in the various industries of the town. Both these classes use the Reference Library largely. As in previous years, the text books presented by the University Correspondence College are greatly in request, and the University of Cambridge lent some of the more valuable books used as text books for the University Extension Lectures.

I think there is nothing else in the statistics to which special attention need be drawn. The preparation and publication of two book Catalogues, the cataloguing and labelling of the "Felix Joseph" collection of China, and the labelling of the fossils, have made this the busiest year for clerical

work that I have yet had, but the whole has been done without any serious hindrance to the ordinary work of the Institution. In the preparation of the "Devonshire" Catalogue, my assistant, Mr. W. H. Walton, rendered invaluable assistance, and dealt with the many details in a most careful and painstaking way.

The last thousand of the new borrowers are thus distributed in the various wards, the second column showing the number that would be reasonably expected per thousand, according to the number of householders.

WARD.				Actual Number of Borrowers.	Number according to Population.
Arboretum	143	160
Babington	153	126
Becket	266	188
Castle	64	118
Derwent	53	64
Friargate	125	115
King's Mead	109	142
Litchurch	87	87

Becket Ward furnishes far above its proper quota of readers, Babington and Friargate Wards are also considerably in advance. Litchurch Ward has exactly its right proportion, and the other wards fall below. Castle Ward supplies only slightly more than half its proper share.

The news rooms are as fully used as ever, and I have not had any complaint of the conduct of those who frequent them, neither has there been the slightest difficulty in securing and maintaining orderly behaviour. Early in the year there was an epidemic of that petty pilfering, which is never entirely absent from our own and similar institutions, but a printed appeal to those using the rooms to protect their own property, had the desired effect, and I am glad to say that we have had no case now for some months.

I am very glad indeed to report that the re-arrangement of the fossils in the Museum is at length completed. The work has been a long and an arduous one, and the Sub-Committee charged with this special work has spared neither time nor trouble in carrying it out. The collection now consists of about 3,600 specimens, local species being well represented, and the whole forms just such a collection of types as will be most useful to the

Student of Geology. Many purchases have been made, both in England and on the Continent, and a few blanks have been left for typical specimens which it is hoped may be obtained at some future time. Now the work has been completed, it is right to place on record here that Mr. J. W. Carr, M.A., did most of the naming, Messrs. A. H. Stokes, F.G.S., and H. Arnold-Bemrose, M.A., F.G.S., the greater part of the classification and arrangement, while the whole of the mounting has been most intelligently and carefully done by our own man, Mr. George Pullen. To one and all of these willing helpers I beg to express my deepest obligations.

The completion of this re-arrangement put a certain amount of case room at the disposal of the Committee, and this they have decided to devote to specimens of Local Archæology. The few specimens they possess have been placed in position, and doubtless other specimens will be obtained from time to time, particularly now that the attention of the local Archæological and Natural History Society has been called to the matter. The Committee will, I am sure, be glad to receive and find room for, suitable local specimens from any source.

A short time since, the Rev. C. G. K. Gillespie, an eminent Egyptologist and Oriental scholar, kindly undertook to see how far the inscriptions on the mummies in the Museum could be deciphered and devoted much time and trouble to that end. He writes me that he has not quite finished the work of translation, but he assures me that the mummies are of special interest, and that although the inscriptions are not absolutely complete or continuous, sufficient is clearly legible to give hope of results of a permanently interesting character.

The principal members of our staff have remained unchanged during the past year. To their zeal and efficiency I have always had the utmost pleasure in testifying, and now do so again with very great satisfaction. It only remains for me to express my personal obligations to the Chairman and all the members of the Committee for the kind consideration I always receive at their hands, and their anxiety to make my many duties in connection with this Institution as pleasant as possible to discharge.

The usual tables are appended to this Report, and also the Report on my visit to the Meeting of the Library Association in Paris, which you did me the honour to order to be printed.

I remain, Gentlemen,
Obediently yours,

W. CROWTHER,

LIBRARIAN AND CURATOR.

November 1st, 1892.

TENTH ANNUAL REPORT

OF

The Corporation Art Gallery Committee.

THE Art Gallery Committee have very great pleasure in presenting to the Town Council their Tenth Annual Report. The Gallery has been open 278 days, and the number of visitors is shown in the following table:—

	1889-90.	1890-91.	1891-92.
Visitors to Autumn Exhibition	12776	15842	20027
„ Spring „	12540	30799	20648
„ Summer „	5958	10045	11289
Total Visitors	31274	56686	51964
Total Days Open by Payment	206	209	194
„ „ Free	43	44	84
Total Days Open	249	253	278
Average on Paying Days	70·7	82·6	78·3
„ Free Days	388·5	477·7	437·8

These figures, the Committee think, are highly satisfactory. The attendance last year was altogether abnormal, including, as it did, some nineteen thousand visitors who came to see the addresses presented to Her Majesty the Queen. Deducting these, the attendance shows an increase of fourteen thousand on last year, and of twenty thousand on 1889-90. That the extra free day granted by the Council is appreciated is proved by the fact that the average attendance on each of the 84 days is only about 40 less than it was on the 44 days of the previous year; and that out of the grand total of visitors, more than two-thirds came on the free days. The highest attendance on a free day was 1165 on September 22nd, and, on a paying day, 782 on June 6th.

The amount to be asked for from the Council is £322, only £9 more than last year, in spite of the additional free day, a result which is very gratifying. The receipts at the turnstiles have been £45 less than last year, but £34 of last year's receipts were abnormal from the

cause mentioned above; so that the real additional cost of the free day has been about £12. On the other hand, the sales of catalogues have been much larger, and the catalogue value of pictures sold during the year has risen from £360 to £1024, a result gratifying alike to the Committee and to the artists who exhibit.

The Autumn Exhibition was a very good one indeed, and the Art Union in connection with it realised £117 8s., the highest amount yet reached.

In the Spring Exhibition, the experiment of the previous year was repeated with much success, a number of good pictures by Continental artists being added. Both years the Committee have been much indebted to the Messrs. W. & J. DIERKEN, of the Continental Gallery, for valuable and attractive loans.

For the Summer Exhibition, the Committee were fortunate enough to secure the loan of the "First Travelling Historical Collection of Water Colours" from South Kensington Museum. This interesting collection numbered 176 examples and was of inestimable value to Art Students, as well as interesting to the general public. The Committee wish to gratefully acknowledge the readiness with which the Museum authorities met their request for this loan, as well as for the endeavours made to meet their wishes when the annual change of loan objects took place.

The Autumn Exhibition now in progress was opened on October 4th, and seems likely to be as popular as its predecessors. During the four weeks it has been open, it has been visited by 5,400 persons, and the sales have, up to the present, been satisfactory.

The picture "Coriolanus" by W. HAMILTON, R.A., presented to the Art Gallery by E. H. PARES, Esq., J.P., of Hopwell, and briefly referred to in the last Report, has now been received, and put in position. It is a fine work of art, and will form a valuable addition to the permanent collection.

The Seventh Season of Saturday Concerts arranged by the Curator was fully as successful as its predecessors. Sixteen concerts were given which yielded a profit of about £10. The whole series of concerts during the last seven winters now numbers 125, and the profits to the Art Gallery have reached £170. To the Curator, and all those ladies and gentlemen who have so kindly assisted him, the Committee desire once more to present their heartiest thanks.

A heavy loss has been experienced by this Committee in the death of Mr. FELIX JOSEPH, in August last. From the time he first set foot in the Art Gallery, he had been its zealous friend and supporter, and his gifts to it had been almost continuous. The magnificent collection of

Derby China with which he has enriched the Gallery will be to the town his most fitting monument, and will always cause his name to be held in grateful remembrance. When the last Report was issued, the "Felix Joseph" collection numbered 452 specimens. To these Mr. JOSEPH was constantly adding up to the very time of his death, and the collection now contains 600 examples. These have been completely labelled, and an exhaustive catalogue prepared by the Curator under the Chairman's direction. The marks have been carefully copied, and reproduced on the labels, so that the collection is now as valuable to the collector and the student, as it is interesting to the general public. As historical examples of local Art industry, the "Felix Joseph" collection will add to the attractions of the Gallery for all time; to those who knew the generous donor intimately it will always bring to pleasant remembrance

"The touch of a vanished hand
And the sound of a voice that is still."

A fine bowl, silver ladle, and stand ought to be specially mentioned, which Mr. JOSEPH gave for the special purpose of gracing the festal board on important civic occasions, and also the fact that his gifts of china were supplemented by that of 58 beautiful watercolour drawings by ROBERTSON and BREWER, two of the old Derby china painters, and by 24 views in black and white of Derbyshire scenery, by JOSEPH FARINGTON, R.A., each with its attendant engraving. These are all suitably mounted and framed, and formed an attractive feature of the Summer Exhibition.

Death has been busy among the friends of the Art Gallery during the past year. Mr. F. J. ROBINSON, who died in June last, had been a member of the Committee from the foundation of the institution, and his services were neither few nor small. By his death the members of the Committee lose a valued colleague, and by the deaths of the Rev. Canon OLIVIER and Sir WILLIAM EVANS, the Art Gallery loses two warm friends of long standing, whose lively interest in it was shown in many different ways.

The Rev. Canon OLIVIER lent a case of very choice Derby china to the Gallery some eight months ago. Since this report has been in type, Mrs. OLIVIER has generously presented the whole collection to the Art Gallery, in the belief that she is carrying out her deceased husband's wishes, and thus placing before the people of Derby a permanent monument of his kindly interest in the Art Gallery. The warmest thanks of the Committee and of the Council are due to Mrs. OLIVIER for this very handsome and appropriate gift.

In concluding this Report, the Committee beg to assure the Council that their most strenuous efforts shall be directed toward increasing the popularity and usefulness of the Gallery. They think that its present position is one for congratulation. Its exhibitions have

so increased in popularity that there would be no difficulty in securing a much larger number of pictures were there space to exhibit them, and a large number have now to be rejected on every occasion, simply for want of room. The way in which our townsmen appreciate the Gallery is shown by the increased numbers in which they visit it, and by the generous donations given from time to time. The Committee are very glad to know that the installation of the electric light is probably an event of the near future, and this will add much to the attractiveness and suitability of the Gallery to its purpose. They desire in closing to acknowledge the zealous and well-directed services of the Curator, to whom much of the success which attends the Art Gallery is due.

On behalf of the Committee,

WILLIAM BEMROSE,

CHAIRMAN.

November 1st, 1892.

REPORT OF THE LIBRARIAN

ON HIS VISIT TO PARIS TO ATTEND

The Annual Meetings of the Library Association OF THE UNITED KINGDOM.

(Presented to the Committee on September 26th, 1892, and ordered by them to be printed with the Annual Report.)

THE meetings of the Association were held in the Grand Hall of the National Art School, a magnificent room, with its walls decorated with fine frescoes by PAUL DELAROCHE. We were indebted to the courtesy of the Minister of Public Instruction for the use of this room, and for the excellent arrangements made for our comfort and convenience while there. The president of the gathering was M. BELJAME, Professor of English Literature at the Sorbonne, who spoke English fluently, and showed himself an adept at managing the business of public meetings. His welcome to the visitors was in the happiest possible vein. The morning of each day was devoted to the reading of papers, and discussions thereon; and the afternoons to the visiting of the various Libraries and public Institutions.

The papers and reports down for consideration and discussion numbered about thirty, and many of them had necessarily to be omitted for want of time; but among those read were the following:—

- “An Account of the French National Library,” by M. JULIEN HAVET.
- “The British Museum Catalogue considered as a basis for a Universal Catalogue,” by Dr. GARNETT, of the British Museum.
- “French Artists and English Bookbinding,” by Mr. Councillor CEDRIC CHIVERS, of Bath.
- “Present Methods of Cloth-binding,” by Mr. ROGER DE COVERLEY.
- “The Public Libraries of the City of Manchester,” by Mr. Councillor HARRY RAWSON, Vice-Chairman of the Manchester Free Library Committee.
- “Women Librarians,” by Miss KATE JAMES, Librarian of the People’s Palace, London.
- “Remainders,” by Mr. JOSEPH GILBERT.

Dr. GARNETT’s paper opened a very wide subject, and gave rise to a very interesting discussion, and a paper by Mr. DENT, of Aston, on “Free Lectures in connection with Free Libraries,” made me wish that we had a room in connection with our premises suitable for such a purpose. Mr. RAWSON’s paper was a very interesting one, and gave a full record of

library work in the city which was the first to open a free library under Mr. EWART'S Act; and the employment of women in libraries found a vigorous supporter in Miss JAMES. French translations of the last two papers had been prepared and were circulated. Mr. GILBERT'S paper ought to set all aspiring authors longing to print, a-thinking. He makes the astounding statement—and we believe he knows—that the unsold copies of books published in London reach 300,000 every year. Some half-dozen other papers were read, more interesting to the bibliographer and the bookworm than to the practical librarian, and these will doubtless all appear in due course in the *Journal of the Association*, where they will receive all the attention they deserve from a much more extended circle.

Coming now to the places visited, the first was the Mazarine Library, founded by the famous Cardinal who bore that name. It was made a public library in 1691, and is one of the four Government libraries of Paris. It is open daily from eleven till five o'clock, free. It contains 300,000 books and 5,800 manuscripts, and is specially rich in early Bibles and religious books, among them being a copy the famous Bible printed by Gutenberg, and known as the Mazarin Bible. The annual State maintenance grant to this institution is £1,880, of which £1,280 is expended in salaries. The daily average of readers is about 40.

A visit followed to the Library of the Society of the History of French Protestantism, a most interesting place maintained by a private Society, but recognised by the State. The Society was founded in 1852, and now owns 30,000 books, and 400 manuscripts, some of the latter, bearing on early Huguenot history, being priceless. The series of fire and thief-proof safes in which these valuables are kept is not the least remarkable feature of the collection.

On the second day, visits were paid to three typical Municipal Libraries, those in the First and Second Arrondissements, and to the Forney Art Library. These visits were naturally among the most interesting we paid, and some features in these Institutions are worthy of special mention. A capital report was prepared for the Association by His Excellency the Minister of Public Instruction, and this contains most valuable information respecting the Paris system of Municipal Libraries. The work was fairly begun in 1878, at which time there were only nine of these Libraries, and five only were much resorted to by the public. Now there are 64 of them, and the scheme will not be considered complete till there is one in each of the eighty wards of Paris. There is one in each of the twenty Mairies, and the rest are located for the most part in the communal schools. As a rule they are open from 4 to 6, and from 8 to 10 p.m., and from 10 a.m. to 12 on Sundays. Attached to all is a small Reference Department, and they all lend out bound volumes of music. In the year 1890, the total issues reached 1,386,642, whereas in 1878 they

had only reached 23,339. Verily a good record in twelve short years. Of course the Libraries are small, and the total amount raised for their support being only £9,000, gives each an annual income of only about £140. The expense falls on the City funds, and the Libraries are managed by small Committees appointed by the Mayoralty, and presided over by the Mayor; and these Committees are responsible to the Prefect of the Seine. We are told that cases of theft or ill-usage of books is very rare indeed, and that the multiplication of Libraries has had the happiest of effects on the people of Paris.

Some remarks of M. le Ministre on the reading of fiction are so much to the point that I quote them *in extenso* :—

“It must be admitted that, in the totals, the instructive book is far from furnishing the largest quota. Of the 1,386,642 issues in 1890, Fiction alone laid claim to 690,105.

“The proportion is a considerable one, although from the first the Administration has endeavoured to discourage the taste of the public for merely light reading.

“Some years ago, instructions to this effect were given to the librarians, who were invited to use the influence their almost daily intercourse with the frequenters of their libraries was able to give them, to induce the latter to turn, by choice, to works of a more serious nature. The result of this campaign was that, in 1887, the average of issues fell from 24,764 to 22,517. Rather than confine themselves to instructive books, the novel-readers chose to desert the library.

“And the fact is easily explained. It is hard to require of a labourer, or of an artisan, or of a young shop employé, kept close all day long to his bench or his counter, that after his toil he should devote his leisure hours to kinds of reading which require a certain tension of mind, for which, too, his early education has little prepared him.

“It seems, moreover, that it is just this class of readers who deserve thoughtful attention. For the very reason that they come to the municipal libraries to seek amusement, and amusement only, is not the keeping of them away attended with danger? Is not the denial to them of the only kind of reading in which they know how to be interested the way to compel them to take elsewhere pleasures often of a far less innocent nature? The only precaution that need be observed is not to let books of an immoral nature fall into their hands; and it is to this object that the committees, whose business it is to purchase the books, should direct their care and thought.”

Ten of the municipal libraries make the lending out of Art books and single drawings and designs a special feature, and this to me was an entirely new and interesting arrangement. I again quote from the Report before referred to.

“Apart from practical work, books are not sufficient of themselves for the education either of the labourer or of the artisan engaged in manufacture; to complete their technical instruction, and above all to mould and refine their taste, the study of patterns is a *sine qua non*. To this idea is due the creation of municipal libraries for Industrial Art, where is studied, and, above all, lent out, patterns (in the form of prints, photographs and designs) which are of the greatest possible use to the section of the working-class population of Paris

whose callings are confined to Art, and derive their inspiration from it. These Industrial Arts, which have always been the glory of Paris—the cabinet maker's, the porcelain and fan-painter's, the bronze worker's and embroiderer's, that of the skilled pattern-designers of both sexes—all these find the elements of study and comparison, and, as a consequence, of inspiration, in the Industrial Art Libraries."

The chief of these places is the Forney Library in the 11th Arrondissement, founded by a special legacy of £8,000, left by M. Samuel Forney. Here we saw single plates from the most expensive Art books, mounted on linen or cardboard, and placed in portfolios which borrowers could take home. Designs for every conceivable purpose, from gold and silver plate to wall-papers, are thus lent out, and the managers claim justly that these costly books are thus made available for many students at a time instead of few, and they say that already the list of those successful artificers who owe much of their success to the help obtained at this Library is a very long one. Specimens of most beautiful work were shown us, and some Art needlework copied from designs lent by the Forney Library, was the best I have ever seen. Little or no injury is ever done to the most valuable plates, and their issue of technical books and drawings during the year 1890 was nearly 40,000. I am not sure whether the plan would work in England, but think it well worth a trial in these days when Technical Instruction is so much talked about, and so little understood. It should be mentioned that there are facilities for study and for copying in the building itself, and that the number of Art works for loan is about 3,000 volumes and nearly 35,000 engravings and photographs.

A visit was also paid on the same day to the Musée Carnavalet, the historical Museum of the City of Paris, an absolute model of what such an Institution should be; and another portion of the company visited the Arsenal Library, another of the four great National Libraries. This contains 453,000 books, and nearly 10,000 manuscripts, and one of its most interesting features is the possession of the records of the Bastille.

On the Wednesday, the members were received and most hospitably entertained by the President and members of the Cercle de la Librairie, an association of French booksellers, and later in the day were conducted over the magnificent Hotel de Ville, and received by M. le Prefet de la Seine. On Thursday, the most important visit of all was paid, to the National Library, over whose treasures we were shewn by M. Delisle, the courteous chief, and his colleagues. A cursory inspection took us nearly five hours, and we were quite ready for the excellent refreshment which the thoughtfulness of Madame Delisle had provided for us before leaving. This is the only Library in the world larger than that of the British Museum, and its three millions of books occupy twenty-two miles of shelving. Besides these, there is a matchless collection of maps, charts, medals, and gems. The whole Institution is admirably kept, is in perfect order, and fully realizes

the idea of a National Library. There are three large Reading Rooms, one for the working classes, where 20,000 popular volumes may be consulted ; the great "Salle de travail," where in the year 1890, 99,112 readers consulted 398,166 books ; and an inner manuscript room, where we saw some forty or fifty students reading and copying manuscripts, many of which were so precious that they were only issued in carefully locked cases with glass fronts. The Library is not yet fully catalogued, but the work is being rapidly proceeded with. The annual State grant is £31,000, which covers all expenses.

Friday was devoted to miscellaneous sight seeing, and I renewed my acquaintance with several of the churches and picture galleries, and saw the new galleries of the Luxembourg for the first time. On Saturday, a pleasant visit was brought to a pleasant close, by a journey to Chantilly. The Duc d'Aumale had kindly invited the Association to visit his splendid palace, and inspect his art treasures. He himself did us the honour of personally pointing out the principal objects in his magnificent collection, and very handsomely entertained us.

The visit on the whole, was a very successful one, and must be productive of good to those who used their eyes and ears. We were treated throughout with utmost courtesy and consideration ; a representative of the French Government, and also one from the National Library being present at all our meetings, while His Excellency the British Ambassador, Lord Dufferin, was twice present, although very unwell, and made a charming little speech. On all hands, the greatest cordiality was manifested, and everything was done to make our visit pleasant. The many "receptions" differed considerably from similar functions as understood in England ; to put it plainly, there was more speechmaking, and less bodily refreshment. But "other lands, other manners," and the genuine heartiness of the welcome we everywhere received, could not possibly be disputed. I am persuaded that the visit will be productive of much good to all those who took part in it ; and one result will be to draw more closely together, those who, although belonging to different nationalities, are alike striving, by means of the institutions under their charge, to spread instruction and refinement among the people.

I remain, Gentlemen,

Yours obediently,

WILLIAM CROWTHER,

September 26th, 1892.

LIBRARIAN.

TWENTY-SECOND ANNUAL REPORT

OF THE

Free Library and Museum Committee,

For the Year ended September 30th, 1893.

THE Free Library and Museum Committee, in presenting their Twenty-Second Annual Report to the Council, are glad to be able to say that the Institution under their charge is in a prosperous condition, and is doing its work successfully.

The issue of books for the year, particularly in the Lending Department, shows a marked increase which is very gratifying, the issues now reaching a daily average of over six hundred. The new books added during the year number 919, and the replacements of worn-out books amount to 355, making a total of 1,274 books purchased during the year. It has not been thought necessary to publish an additional supplementary Catalogue, but type-written lists of the books added are shown in the Delivery Room. Those who wish for further information respecting the Library are referred to the Librarian's Report, and the exhaustive tables which accompany it.

The building is in a good state of repair. In view of the introduction of the Electric Light, the painting and re-decoration of the Museum and Library have been deferred for a time, but these will shortly be proceeded with. The completion of the Electric Lighting installation is now only a matter of a few days, and will probably be completed by the time this Report is before the Council. The Committee feel sure they have acted in the best interests of the Institution in incurring this expense, as a great saving will be effected in the charges for painting and decoration, as well as in bookbinding; while the amount of benefit both to the staff and to the visitors in the way of better light and increased purity of atmosphere can scarcely be over-estimated.

The cost of the installation will probably be about £370, and the Committee are glad to say that they will be able to pay this, and also

for the necessary cleaning to follow, without either borrowing the money or crippling the usefulness of the Institution. £240 has already been paid the Contractor from the amount which appears as balance in hand on September 29th, and the remainder will just about meet all charges, and enable the Committee to start fairly on the next year's work. The special thanks of the Committee and the Council are due to the small Sub-Committee which has supervised all the details of the Electric Lighting, the members of which have devoted to the task a considerable amount of time and trouble.

The best thanks of the Committee are also due to all those who have sent gifts of books and periodicals to the Institution during the past year, and they also desire to place on record here their complete satisfaction with the way in which the staff discharge their duties, a satisfaction which they believe is shared by the general public.

In the early part of the present year, the Chairman, Mr. Alderman Hobson, intimated to the Committee that failing health compelled him to ask that some relief might be afforded him from the necessity of attending all the meetings of the Committee, and Mr. Councillor Bottomley was consequently appointed Vice-Chairman. They have now, at the close of the year, received with very great regret a further intimation that Mr. Hobson wishes to relinquish altogether the office he has held ever since the foundation of the Institution. The Committee feel that, in the face of the Chairman's earnest wish, they cannot do otherwise than bow to his decision, which they are sure has been the result of much consideration on his part. They therefore accept his resignation with the greatest regret, but think that the resolution given below, which was unanimously passed at their meeting this day, should be placed on record, as an appendix to this Report.

On behalf of the Committee,

WILLIAM HOBSON,

CHAIRMAN.

COPY OF RESOLUTION REFERRED TO ABOVE.

"That this Committee receives the resignation of Mr. Alderman Hobson, J.P., with very great regret. They desire to place on record their sense of the great services he has rendered the Institution of which he has been Chairman for twenty-three years, and they feel that his unremitting attention to its interests has done much to place it in its present prosperous condition. They are sorry for the cause which has led to his resignation and earnestly hope that rest may bring him improvement in health, and that he may find in the evening of his days some solace in the remembrance of the good work he has done in the service of an Institution the success of which has always been dear to his heart."

October 30th, 1893.

*To the Chairman and Members of the Derby Free
Library and Museum Committee.*

GENTLEMEN,

It gives me very much pleasure to lay before you my Eighth Annual Report. The number of books in the Lending Library now reaches 17,402, against 16,958 last year; the total issues amount to 145,177, against 134,763, an increase of nearly 10,500; and the daily average issue has risen from 515 to 560. The increase has been a steady one throughout the year, and applies to every month alike, and all classes of books have shared in the increased demand. The new books added number 785; and out of 659 books withdrawn as worn out, 355 have been replaced by new copies; the remainder, principally three volume novels of ancient date, have had their places declared as vacant, and will be replaced by something better. Twenty-two volumes have been lost and paid for, two only have been totally lost, while thirteen coming from infected houses have been destroyed. The plan we have followed for some years with regard to the last-named class continues to work well, and the public may use the Library with confidence without any fear of infection. I am glad to say once more that on the whole the books are very well used, instances of wilful damage being rare, but we still have to suffer through occasional acts of carelessness or thoughtlessness, particularly on rainy days, when books are occasionally brought in very wet, when a little care would have kept them dry.

The Reference Library stock now numbers 9,798 works, of which 134 have been added during the past year, and no volumes have been withdrawn. The Committee exercise great care in the selection of the new books in this department, and are most anxious to keep the Reference Library thoroughly up to date, particularly with regard to Scientific works. They would be very glad, for the sake of both departments of the Library, to receive suggestions from the public as to books which might be purchased, and would like to see the fullest use made of the Proposal Forms to be found in the Reading Rooms, merely asking that all who use them should take care to ascertain that the books proposed are not already in the Library, which at present is not always done. The Specifications of Patents are still very largely consulted, and the Text-books presented by the University Correspondence College are greatly used by students preparing for various examinations.

The number of new borrowers during the year is about the same as usual, nearly 1,100, and I should fancy that the number of those using the Library is greater than ever. The number of cards cancelled through deaths or removals is only 107, but the number of borrowers who withdraw without notice is considerable, and the number of those who only borrow intermittently is larger still, so that the actual number of borrowers using the Library at any given time is rather difficult to gauge with certainty. The number of books re-bound has been 534, and the number passing through our binder's hands for other reasons—repairs great or small, numbering, lettering, labelling, &c.,—is no less than 3,171. Reference to the tables will show many other interesting facts in connection with the working of the Library.

The occupations of our borrowers are as various as ever, as a reference to Table 6 will show. The large number described as of no occupation are, I believe, principally housewives, and the term is in their case to a great extent a misnomer. I again give a table showing the districts from which our borrowers come, the last thousand being thus distributed:—

WARD.	Actual Number of Borrowers.	Number to be expected according to Population.
Arboretum	123	166
Babington	155	121
Becket	217	196
Castle	76	114
Derwent	61	63
Friar Gate	128	111
King's Mead	118	143
Litchurch	122	83

Becket, Babington, Friar Gate, and Litchurch Wards furnish considerably more than their quota of readers, the last-named nearly half as many again as might be expected. Derwent Ward has about the proper number, and the remaining wards fall below. Castle Ward shows, however, a marked improvement on last year's figures.

The News Rooms are, if possible, more used than ever, and there is little to complain of in the behaviour of those who use them. I have always found that a word of caution is sufficient if anyone is found transgressing; and I believe that the great majority of those who use the rooms are as anxious for good order as I am myself. The year has not passed over without a few petty thefts, but even these have been less than

usual, and I hope that I may ere long have to report a clean sheet in this respect.

The only additions made to the Museum during the year have been a small collection of Geological and Archæological specimens purchased from the Trustees of the Museum at Brampton, near Chesterfield. The Mineral and Geological collections have been more made use of by students during the past year than I have ever known them; and the visitors to the Museum generally show no diminution.

As your Librarian I attended the Annual Meeting of the Library Association, held this year at Aberdeen, and derived much profit therefrom. I had while there the honour of being elected, for the third time, a Member of the Council of the Association, and I have been since elected as Chairman of the North Midland Library Association for the ensuing year. I accept both appointments as much as a testimony to the importance of the Institution which I represent, as a compliment to myself.

The principal members of our staff have remained unchanged during the past year. I cannot speak too highly of the way in which they discharge their duties, and I believe they do their best to serve both you and the public faithfully. I desire also to express the obligation I feel toward the Press of the town for their ready co-operation in all that tends to the benefit of the Institution; and, lastly, to yourselves for the uniform kindness and consideration I receive at your hands.

I remain, Gentlemen,

Very faithfully yours,

WILLIAM CROWTHER,

LIBRARIAN AND CURATOR.

October 30th, 1893.

ELEVENTH ANNUAL REPORT

OF

The Corporation Art Gallery Committee.

THE Art Gallery Committee have much pleasure in presenting their Eleventh Annual Report to the Town Council. The Gallery has been open during the past year 239 days, as compared with 278 days in 1892, and the number of visitors is shown in the following table:—

	1891-92.	1892-93.
Visitors to Autumn Exhibition	20027	17399
„ Spring „	20648	17456
„ Summer „	11289	11290
Total Visitors	51964	46145
Total Days Open by Payment	194	156
„ „ Free	84	83
Total Days Open	278	239
Average on Paying Days	78·3	85·
„ Free Days	437·8	396·4

These figures, the Committee venture to think, are quite satisfactory, varying but little from those of 1892. The average attendance on the free days is rather less, and on the paying days a little more than last year, but the total number of visitors is more by fifteen thousand than it was three years ago. The largest attendance on a free day was 802, and on a paying day 347, both days being in Whit-week.

The amount to be asked from the Council is £6 more than last year. The Gallery having been open for six weeks less accounts for a diminution of the same amount in the turnstile receipts, while Commission on sale of Pictures is £20 less. The Committee, however, think, considering the long depression of trade, they have been fortunate in disposing of pictures to the Catalogue value of £515 16s. The sale of Catalogues steadily increases.

The Autumn Exhibition was very good in quality, and the Art Union in connection with it realised £105 6s.

In the Spring Exhibition, a number of Continental pictures were again added, much to the improvement of the collection, and the thanks of the Committee are due to the proprietors of the Hanover Gallery for kindly lending these from their collection. Special thanks are also due to H. Evans Broad, Esq., M.P., for the loan of the fine picture presented to him, and painted by Professor Herkomer, R.A.

The Summer Exhibition consisted of pictures kindly lent by private owners, mostly residing in this neighbourhood, and proved a great success. The Committee are under obligation to those gentlemen who so kindly responded to their request for loans, and, as the experiment was so successful, they, when a sufficient time has elapsed, hope to repeat it. Among those residing at a distance who kindly contributed were John Aird, Esq., M.P., J. Fellows, Esq. (of West Bromwich), E. M. Kidd, Esq. (of Nottingham), Mrs. W. J. Smith (of Lichfield), Messrs. A. and F. Pears, and the Proprietors of the "Graphic."

The Exhibition now in progress has thus far been very satisfactory, no fewer than 8,100 visitors having passed the turnstiles during the four weeks it has been open. It may be mentioned that, as a proof of the growing estimation in which the Gallery is held by artists, the Hanging Committee had about seven hundred pictures submitted to them for this Exhibition, but the space at their disposal only allowed of about four hundred and thirty being selected.

The annual change of objects on loan from the South Kensington Museum took place at the usual time, and the cases now contain some excellent specimens of wrought iron work, pottery, and electrotypes of armour. The Committee desire to acknowledge the readiness with which any suggestion they make as to suitable objects for loan is acted upon by the Museum authorities, and anxiety evinced to send such objects as may be useful to the various industries of the town and neighbourhood.

The eighth season of Promenade Concerts, organised by the Curator, took place during last winter. Eighteen Concerts were held, attended by over 3,400 persons, and yielded, as usual, a substantial profit. As a new feature, three Literary evenings were introduced in the series, when short lectures were given by the Curator on the life and works of Tennyson, Longfellow, and Shakespeare, and were interspersed with musical illustrations. The Lectures having proved so successful, further

experiments in the same direction will be made during the coming season. The best thanks of the Committee are due to the ladies and gentlemen who kindly gave their services on these occasions, and also to His Worship the Mayor (Mr. Councillor Marsden, J.P.), the Ex-Mayor (Mr. Councillor Harrison, J.P.), and to Lieut.-Col. Buchanan, J.P., who respectively presided at the Literary evenings.

By far the greatest event in the history of the Gallery during the past year has been the installation of the Electric Light. This has now been in operation for about three weeks, and the improvement in the lighting is very effective, and will without doubt eventually cause a considerable saving in painting and decorating the Gallery, and less deterioration to the valuable works of art.

In conclusion, the Committee desire to place on record the zeal displayed by the Curator for the welfare of the Art Gallery, and their opinion that to his well-directed efforts much of its success is mainly due.

On behalf of the Committee,

WILLIAM BEMROSE,

October 30th, 1893.

CHAIRMAN.

TWENTY-THIRD ANNUAL REPORT

OF THE

Free Library and Museum Committee,

For the Year ended September 30th, 1894.

THE Free Library and Museum Committee have very much pleasure in presenting to the Town Council their Twenty-Third Annual Report, and are glad that in doing so they can testify to the undiminished popularity and usefulness of the Institution committed to their charge.

The Statistical Tables appended to the Librarian's Report will be found to contain many interesting details, and to those Tables all are referred who are interested in the inner working of the Library. The Committee feel, however, that they should draw attention to the increased issues in the Lending Library, which amount to more than ten thousand in the year just closed, and also to the fact that no fewer than 1,410 books have been added during the same period, of which 522 were replacements of books worn out, and the remainder entirely new. The Library stock in the two departments now amounts to 28,086 works. It will very soon become a question of shelf-room for the accommodation of the ever-increasing number of books, and the Committee have at present under consideration a scheme which will afford much relief, by the separation of the Juvenile books from the others, and thus set a large quantity of shelf-room at liberty, and also add materially to the comfort of adult borrowers, and the facility with which they can be served.

No new Supplementary Catalogue has been issued this year, but the Committee feel that the time has now arrived when the Catalogue as a whole should be grappled with, and they have adopted the suggestion of the Librarian, that the whole should be republished, but in Sections, and that Section dealing with Science, Art, and Technology is now in course of active preparation, and it is hoped may be issued by about Christmas.

The building is in a good state of repair. The Electric Light installation was completed on December 13th last, and since that time has been in full operation, very much to the advantage of everybody and everything concerned. The irregularities of supply have been but slight, and although the cost is at present considerably in advance of that of gas, the Committee have no reason to regret having made the change. It is a source of satisfaction to them that they have been able to pay for the Electric Light, and also for the painting and cleaning of the whole Institution, inside and out, without borrowing money, or in any way impairing the usefulness of the Institution. The charges for painting and bookbinding will undoubtedly be less in the future.

The Committee's best thanks are due to those who have kindly given books, periodicals, and other articles during the past year, and they close this Report by placing on record their complete satisfaction with the manner in which the staff discharge their duties, and they believe that their feeling in this matter is shared by those residents who use the Library.

On behalf of the Committee,

GEORGE BOTTOMLEY,

CHAIRMAN.

October 29th, 1894.

*To the Chairman and Members of the Derby Free
Library and Museum Committee.*

GENTLEMEN,

I have the honour to lay before you my Ninth Annual Report, and perhaps I might be permitted at the outset to make a few comparisons between the Stock and issues at the time of my appointment, and those it is my pleasure to lay before you for the year just closed.

LIBRARY STOCK.						ISSUES.	
LENDING.			REFERENCE.			TOTAL.	DAILY.
1884-5	...	13,020	...	7,850	...	111,864	... 438
1893-4	...	17,953	...	10,133	...	155,827	... 605

These figures speak for themselves. We have now 7,216 more books, the year's issues are nearly 44,000 more, and there is an increase of 167 in the daily issues. For the year just closed, the figures in the Lending Department show an increase of more than ten thousand issues over 1892-3, and the daily issue is 45 higher. The Reference Department is slightly less than the preceding year, but that is accounted for by the fact that at the close of last year, during the progress of the Electric Light installation, there were several weeks, and that at the busiest time, when the Library was only in partial use during the evening.

The number of new books added during the year has been 755 in the Lending Department, and 335 in the Reference, the latter including about two hundred volumes of Patent Specifications. The number of books withdrawn as worn out is 707, and of these 522 have been replaced, the remainder being books whose places have been declared vacant. Seven volumes have been lost and paid for, eight coming from infected houses have been destroyed, and four have been totally lost. I have to repeat the remark of former years, that on the whole, the books are very well used, and cases of wilful damage are rare, although we still suffer from acts of carelessness on the part of our borrowers.

The Book Committee have paid special attention to the Scientific books in both Libraries, and works of great value and containing the newest information have been steadily added. Our percentage table shows an increase in every department of the Library except fiction, which shows a corresponding decrease. Juvenile books have been added largely of late years, and are much patronised, and I think that their separation

from the rest of the Library will be an advantage all round, if it is found possible to do so. There has been a considerable amount of controversy lately as to what young people read in the way of tales, and I have taken the trouble to ascertain the issues of two favourite authors, one for boys, and one for girls. We have in the Library 98 copies of books by G. A. Henty, and 76 by Mrs. Marshall. I find that the former were issued 5,400 times during the year, and the latter 2,400 times, an average of 18 a day in the case of the boys' book, and of 8 in the case of the girls'. When it is borne in mind that there are other authors nearly as popular for both sexes, it will be seen how largely this department is used.

We have added 1,207 new borrowers during the year, and the number of cards cancelled is only 101, so that the number of borrowers is greater than ever. Table 6 showing their occupations, is always an interesting one, and shows that we draw on all classes for our customers. About one-fifth return themselves as of no occupation, but this class includes most of the married women, and the description does not by any means accurately describe them, although it is the only one open. I give again a Table showing the distribution of our last thousand borrowers in the various wards of the town, which shows about the same results as formerly. The number from Derwent Ward is about that to be expected, Babington, Becket, Friar Gate, and Litchurch wards supply more than their quota of readers, the first named Ward having the highest average, while Arboretum, King's Mead, and Castle Ward fall below.

WARD.				Actual Number of Borrowers.	Number to be expected according to Population.
Arboretum	140	168
Babington	159	122
Becket	210	198
Castle	77	115
Derwent	62	64
Friar Gate	144	113
King's Mead	112	145
Litchurch	96	75

The number of people using the News Rooms is as great, if not greater, than ever, and I have had little cause to complain of the conduct of those frequenting them. The rule of silence is on the whole well observed, and a word of caution has always been found sufficient where there was a disposition to break it.

There have been no important additions to the Museum during the year, beyond some remains presented by the Directors of the Midland

Railway Company. The Committee has, however, undertaken the re-arrangement and thorough overhauling of the Natural History specimens, and the Mammals have now been completed. Worthless specimens have been rejected, and the whole collection has been thoroughly cleaned and put in order, and the cases repapered. The rest of the specimens will be dealt with in due course. Visitors to this department are as numerous as ever, and the proportion of students is certainly on the increase. With regard to the number of visitors to the Institution as a whole, it is impossible to tell exactly, but I estimate that at least eight times the whole population of the Borough enters our doors during the year.

As your Librarian, I attended the Annual Conference of the Library Association, held this year at Belfast. The proceedings were of more than usual interest, and there was a very complete exhibition of Library appliances. I had the honour of being elected a member of the Council of the Association for the fourth year in succession.

There has been no change in our staff, I am glad to say, during the past year, and I can only repeat what I have said on former occasions as to the way in which they discharge their duties. I do not think that either the Committee or the public could be better served. In closing, I desire once more to place on record my sense of the obligation under which I am to the Press of the town and neighbourhood for their hearty co-operation and help in everything tending to the good of the Library and Museum. To yourselves I also desire to tender my heartiest thanks for the ready help and consideration I have always received at your hands, which make my work here a pleasure.

I remain, Gentlemen,

Very faithfully yours,

WILLIAM CROWTHER,

LIBRARIAN AND CURATOR.

October 29th, 1894.

TWELFTH ANNUAL REPORT

OF

The Corporation Art Gallery Committee.

THE Committee of the Art Gallery have much pleasure in presenting their Twelfth Annual Report to the Town Council, and in congratulating them on the continued popularity and usefulness of the Institution committed to their care. The Gallery has been open 250 days, and the number of visitors during the last three years is shown by the following Table:—

	1891-22.	1892-93.	1893-94.
Visitors to Autumn Exhibition	20027	17399	20300
„ Spring „	20648	17456	20840
„ Summer „	11289	11290	13156
Total Visitors	51964	46145	54296
Total Days Open by Payment	194	156	164
„ „ Free	84	83	86
Total Days Open	278	239	250
Average on Paying Days	78·3	85·	83
„ Free Days	437·8	396·4	473

These figures clearly show that increased interest is taken in the Art Gallery. It will be noticed that while the average attendance on the paying days remains practically the same, there is a considerable increase on the free days. In 1889-90, when the Gallery was open 249 days, the attendance was only 31,274. During the past year the largest attendance on a free day was on Oct. 28th, when 1,883 persons passed the turnstiles, the attraction being the exhibition of the beautiful Dessert Service manufactured by the Royal Crown Derby Porcelain Company, as the wedding present from the Borough of Derby to their

Royal Highnesses the Duke and Duchess of York. The greatest number of visitors on a pay day was on Whit Monday, when 565 passed through the Gallery.

The deficiency is a little greater this year than last, and is accounted for by the expense incurred in thoroughly repainting the building, the purchase of medals awarded at the Photographic Exhibition, and by the reduction in the amount received as commission on the sale of pictures. The pictures sold were of the catalogue value of £419; which, owing to the depressed state of local trade, must be considered satisfactory. The number of catalogues sold reached 5,953 copies, an excess on former years.

During the year, the usual number of Exhibitions has been held. The Autumn Exhibition was good in quality, and the Art Union in connection with it realised the sum of £92 15s. od.

The Spring Exhibition was of exceptional merit, and the Committee were fortunate in obtaining from the Trustees of the Chantrey Bequest, the loan of Sir Frederick Leighton's beautiful picture, the Bath of Psyche. There were other fine pictures; local art was well represented, and the Exhibition was deservedly popular.

The Summer Exhibition consisted of Photographs, and a number of representative exhibits were secured. Medals were awarded, and in the opinion of the judges, Messrs. England and Mayland, the Exhibition took high rank as to the quality of the works submitted. In the lower Gallery there was a small collection of sketches by the late Charles Jones, the eminent animal painter, and the thanks of the Committee are specially due to that gentleman's son, Mr. Bertram Loud, for the interesting loan.

The Autumn Exhibition now in progress, without containing many important pictures, is interesting, and the general level shows improvement. That the Gallery continues to rise in the estimation of Artists is shown by the fact that nearly two hundred more pictures were submitted for selection than could be hung, and that it is appreciated by the general public because it has attracted 8,000 visitors during the month that it has been open.

Mr. and Mrs. Henry Boden, of the Friary, have presented to the Art Gallery Ceramic Collection a number of pieces of Derby Porcelain of various periods, including some special examples of modern manufacture, among which are specimen plates from the dessert service presented respectively to the Duke and Duchess of York, and the Right Hon. W. E. Gladstone.

The Chairman of the Art Gallery also presented to the "Felix Joseph Collection" a plate from the celebrated "Barry" dessert service. The thanks of the Council and Committee have been tendered to these donors. The Committee trust that others will be found willing to add to the Art Treasures already possessed by the Town.

The objects on loan from South Kensington Museum, filling four cases, have recently been changed, and the present selection includes specimens of electrotypes, ancient and modern pottery and porcelain, ancient jewellery and glass, most of which examples are likely to be of benefit to the Art industries of the Borough.

The Promenade Concerts on Saturday evenings, organised by the Curator, were held as usual during the winter, and the Ninth Season proved quite as attractive and satisfactory as its predecessors, and yielded a similar profit. The thanks of the Committee are specially due to the ladies and gentlemen, both professionals and amateurs, who give their services without fee or reward on these pleasant occasions.

A year's working of the Electric Light enables the Committee to speak from experience as to the great benefit the Gallery has derived from its introduction. The pictures are certainly better seen than before, and the atmosphere is far purer. The cost of the Electric Light as compared with gas is about £36 against £26, and whilst obtaining a superior light, the expense of painting and cleaning will be reduced in future.

The Committee, in closing their Report, desire once more to bear testimony to the zeal and efficiency with which the Curator discharges his duties, and to express the hope that the Art Gallery will continue to afford both pleasure and benefit to the ratepayers.

On behalf of the Committee,

WILLIAM BEMROSE,

CHAIRMAN.

October 29th, 1894.

TWENTY-FOURTH ANNUAL REPORT OF THE Free Library and Museum Committee, *For the Year ended September 30th, 1895.*

THE Free Library and Museum Committee present their Twenty-Fourth Annual Report to the Town Council with very great pleasure, believing that at no time in its history has the Institution been doing more or better work than at the present, and that the advantages it offers to the Ratepayers have never been more highly appreciated.

The issue of books in both Lending and Reference Departments shows a substantial increase, which would have been greater still were it not for the fact that during the two months preceding the opening of the new Children's Department, juvenile books were gradually withdrawn from circulation. 1258 New Books were added during the year, of which 221 were replacements, and the total Library stock in all departments is 29,173 books. A change foreshadowed in the last Report has now taken place, and with excellent effect. One of the rooms has been specially fitted as a Children's Library, and to stock it about 900 books were withdrawn from the main Lending Library, and about 500 new ones purchased. Juvenile readers from 8 to 14 years of age have now a well-selected Library of 1,400 volumes. Considerable relief has been afforded to the over-crowded shelves in the Lending Department, and older people can get their wants attended to with greater celerity. During the three months the department has been open, more than three hundred borrowers have been enrolled, and the daily issue amounts to about fifty volumes.

The Committee have made another new departure during the past year. A good deal has been said from time to time about providing a branch in the Litchurch division of the Borough, and a step has been

taken in that direction. The Arboretum Committee was approached for the purpose of securing the tenancy of the room near the Rosehill Street entrance to the Arboretum, known as the Refreshment Room. They met this Committee very liberally in the matter, and possession was obtained at Michaelmas. The room has been put into repair, and thoroughly cleaned, and on October 31st it was opened as a Reading Room, in which capacity alone it is proposed to use it for some six months to come. A representative number of Papers and Magazines, daily, weekly, and monthly are supplied, and will no doubt be much appreciated. The question of a Library is merely one of finance. There is plenty of room for the accommodation of as many books as the neighbourhood would require, when a suitable time comes for providing them. At present, however, the Committee feel that providing the requisite sum for starting such a Library is a task which with their present income they could scarcely undertake, although once started, they would find little difficulty in maintaining it. In similar cases, in other towns, books have often been obtained by local effort, or as a gift from some public spirited citizen, and this Committee would gladly hear of such a result following the provision of the premises here.

A portion of the new Catalogue of the Library has been accomplished during the past year. The Scientific books were considered the most important to be dealt with first, as being most in arrear, presenting the most formidable task, and being generally of the most importance. The work was a difficult one, but it has been successfully coped with, and the Lending portion was issued some months ago, forming a volume of 150 closely printed pages. The Reference portion will be nearly as large, and both it and the Children's Catalogue are now going through the press. Other portions of the Catalogue will be dealt with directly these are finished. This has added much to the Librarian's duties during the year, and the Committee have been obliged to obtain for him additional temporary clerical help.

The Building is in a good state of repair. The Electric Light installation has proved a complete success. There have been no serious complaints to make as to the supply, and although, as was expected, it is more expensive than gas, the light is better, the air is purer, and there is little or no deterioration in the painting of the walls and ceilings. For the first time since 1881, there is a balance on the wrong side of the account of about £104. This has been occasioned

by the special expenses which have had to be incurred. These include a sum of nearly £75 for the purposes of the Children's Library; £75 for the preparation and printing of the Scientific Catalogue; and nearly £6c for work which had to be undertaken in the Curator's house in consequence of the necessity for the re-arrangement of the water supply. There is no reason for supposing that the expenses of next year will include any abnormal items, and consequently this state of things will in due time be remedied.

The best thanks of the Committee are due to those who kindly gave books, papers, and other articles to the institution during the past year, and among these should be specially mentioned the late James Adey Birds, Esq., who died at Bournemouth last December, and left by his will his Geological and Mineralogical collections to the Museum. The Trustees of the British Museum have also handed over some very valuable duplicate mammals, reptiles, shells, and insects, and the donors of books and papers have been as numerous as usual.

The Committee cannot close this Report without placing on record their sense of the efficient manner in which the Librarian discharges his many duties, and the loyalty with which his efforts for the benefits of the Institution are seconded by all the members of his staff.

On behalf of the Committee,

GEORGE BOTTOMLEY,

CHAIRMAN.

November 1st, 1895.

*To the Chairman and Members of the Derby Free
Library and Museum Committee.*

GENTLEMEN,

I HAVE the honour and pleasure of laying before you my Tenth Annual Report. The past year has been the busiest I have ever had in your service. The ordinary work, as the accompanying Tables show, is ever increasing. A new Department for Children has been organised and set to work. The whole of the scientific books have been newly catalogued, and the necessary arrangements have been made for opening a Branch Reading Room. In addition, a considerable amount of re-arrangement has been done in the Museum, and my work in connection with the Art Gallery increases rather than diminishes. My time has therefore been very fully employed. but, thanks to your ready co-operation and the loyal and willing help I receive from the whole of the staff, whose duties, like my own, are at times extremely heavy, the work has been done pleasantly enough, and I hope and believe to your satisfaction and that of the ratepayers.

A few figures, by way of comparison, will say more as to the increase of the Library and its work than anything else, and these I give below.

	TOTAL BOOKS.		TOTAL ISSUES.		DAILY AVERAGE.	
November, 1885	...	20,970	...	111,864	...	438
„ 1890	...	24,673	...	146,649	...	552
„ 1895	...	29,173	...	172,262	...	658

The special figures belonging to this year's work will be found in the accompanying Tables, which, I think, contain all information likely to be interesting, and do not present any special features in any of the results shown. New books have been steadily added, and all departments of the Library kept well up to date, sufficient new books to give

the Children's Library a good start having been made a special feature. I have again to report that there is very little to complain of in the way the books are used, and such damage as comes under our notice is rather the result of carelessness than any attempt at wilful injury. With the Children's Library we shall have more opportunity of careful supervision and examination, and I am glad to say that up to the present there has been absolutely no occasion for complaint. The habit of making marginal notes, is not quite extinct with some of our older readers, but the comments rarely exhibit any critical value, and are mostly an exposure of the writer's ignorance of the subject he comments upon.

I think it is well to reiterate the fact that we take every possible precaution to prevent the Library becoming a means of spreading infection. I am constantly asked for information as to what we do, and it may perhaps be as well to state once again that we are regularly supplied, by the Sanitary Authority, with a list of the infected houses in the Borough, and under no circumstances is a book, which at the time is in such a house, allowed to come back to the Library. The householder is immediately warned and the book burned, either by an official of the Sanitary Authority, or by ourselves should it be brought to us.

The number of new borrowers added during the year is about normal. Table VI shows the occupations of the last thousand of them, and presents several interesting features, and their distribution in the various Wards of the town is nearly the same as in previous years. The accompanying Table shows this distribution.

WARD.	PER THOUSAND.	
	Actual Number of Borrowers.	Number to be expected according to Population.
Arboretum	133	168
Babington	162	122
Becket	232	198
Castle	64	115
Derwent	52	64
Friar Gate	127	113
King's Mead	117	145
Litchurch	113	75

The News Rooms are just as extensively used as ever, and are at times inconveniently crowded. There are no complaints to be made about the conduct of those who use them, except that we have not been entirely free from pilfering during the year. I am sorry to say that the majority of these petty thefts are of such a character as to indicate that they are not perpetrated by the most ignorant among the readers, and that the thieves, judging by the choice they make, must possess a considerable amount of literary discrimination and artistic taste. I am sure that offenders of this kind are a very small minority amongst those who use the Rooms, and that the great majority of our visitors are as anxious as we are ourselves that proper order in every way should be maintained.

Important donations have been made to the Museum this year, as referred to in the Chairman's Report. The Birds collection has been thoroughly overhauled and cleaned, and a portion of it placed on exhibition. The Committee hope to arrange for the bulk of the specimens it contains being lent to various Schools for teaching purposes, after the blanks in our own collection have been filled up. The duplicates received from the British Museum Trustees, which I was allowed to personally select, enabled us to complete as large a collection of typical Reptilia as we have space for. Our previous stock was carefully gone through, imperfect specimens destroyed, and uniform stoppered jars purchased. The whole collection has been properly labelled and placed in position, and when one or two English specimens have been obtained, which is only a matter of time, the Reptiles will be as complete a collection as the room at our disposal will permit.

As in former years, I had the pleasure of attending the Annual Conference of the Library Association, held this year at Cardiff. The proceedings were interesting, and the discussions on Library work profitable, and not the least valuable feature was a complete exhibition of Library fittings and appliances. I had the honour of being elected for the fifth time a member of the Council of the Association.

There has been, I am glad to say, no change in our staff during the past year, and I have once more to express my satisfaction with the

way in which they one and all discharge their duties. As heretofore the Derby newspapers have been willing coadjutors with me in everything that has tended to the benefit of the Institution, and to those connected with them I am under many and deep obligations. Finally I have to thank you all for your kindly help and consideration, and to express the hope that the work here, in which I find the greatest possible pleasure, may always be carried on in such a way as to deserve your approval and merit a continuance of your confidence.

I remain, Gentlemen,

Very faithfully yours,

WILLIAM CROWTHER,

Librarian and Curator.

November 1st, 1895.

THIRTEENTH ANNUAL REPORT

OF

The Corporation Art Gallery Committee.

THE Art Gallery Committee have pleasure in presenting their Thirteenth Annual Report to the Town Council. The Gallery has been open 249 days, and the number of visitors for the last three years may be seen by reference to the following Table:—

	1892-93	1893-94	1894-95
Visitors to Autumn Exhibition	17399	20300	17747
" Spring " 	17456	20840	18070
" Summer " 	11290	13156	11980
Total Visitors	46145	54296	47797
Total Days Open by Payment	156	164	160
" " Free	83	86	89
Total Days Open	239	250	249
Average on Paying Days	85	83	68
" Free Days	396.4	473	415

The absence of any special attraction and the long and severe winter did much to make the number of visitors below that of last year, both in gross and in average. The highest number admitted on a paying day was 428 on Whit Monday; and the highest on a Free Day, 844 on Easter Wednesday. The Council will be interested to know that during the first four years the Gallery was open, the visitors numbered 105,139; during the second four years 124,465; and during the third similar period, 209,091; the total visitors during the thirteen years being 486,492.

The deficit to be paid by the Council is less than last year's by £51. The pictures sold during the Exhibitions were of a Catalogue value of £505 17s. od., or £86 in excess of last year, and the number of catalogues sold reached 5,412. The Art Union realised the sum of £75 8s. od., rather less than usual. The Exhibitions have been kept up to their usual standard of merit, and as a proof that the Gallery is growing in popular repute, the Hanging Committee at their last few exhibitions have always had more pictures submitted to them than they were able to hang, a very different state of affairs from that which obtained some few years since. The Spring Exhibition was a specially interesting one, and the thanks of the Committee are due to those gentlemen who kindly lent pictures. A good selection was made from the pictures of the Newlyn School, which had been on exhibition at Nottingham Castle, and a considerable number of pictures came on to us from the Birmingham Winter Exhibition, while the President and Council of the Royal Academy lent us the beautiful Chantrey Bequest picture, "Hopeless Dawn," by Mr. Frank Bramley, A.R.A. For the Summer Exhibition the Committee secured the Third Historical Travelling Collection of Water-Colours from South Kensington Museum, a collection specially interesting from a student's point of view; and for the Upper Gallery, the collection of pictures by Mr. Byron Cooper, illustrative of Tennysonland. These two collections made a very attractive Exhibition.

The Autumn Exhibition, now in progress, is fully up to the average in the number and merit of the pictures exhibited, and is especially strong in Water-Colours. During the month it has been open, it has been attended by 6,000 visitors.

The contents of the four cases lent to the Art Gallery by the Department of Science and Art were changed at the usual time, and the objects now on loan include a case of electrotypes, one of Oriental China, and some very choice specimens of early English iron and wood-work, as well as some very good Indian objects. The Committee again have to acknowledge the ready courtesy of the Department, and the anxiety of the officials to send such specimens as the Committee desire, and more particularly those likely to be useful to the Art Industries of the district.

The tenth Season of Promenade Concerts took place on the Saturday Evenings of last winter, and repeated the successes of former

seasons. The Committee are glad to take this opportunity of thanking very heartily all those who assist in these pleasant entertainments, which have done so much to popularise the Gallery.

The Electric Light continues to give satisfaction, and is not more expensive than was expected. Its cost during the past year has been £34 10s. against £36 last year, and about £8 more than the last gas bill. On the other hand the Gallery is much better lighted, and the painting and decoration of the building show little or no signs of deterioration, and will last at least twice as long as it has done previously.

The Committee are glad to report that more use has been made of the Gallery by students, for copying purposes, during the past year than at any time during its existence, and they hope that the usefulness of the Gallery will go on increasing. They desire once more to acknowledge the valuable services of the Curator, to whose zeal and assiduity in the discharge of his duties much of the success of the Art Gallery is due.

On behalf of the Committee,

WILLIAM BEMROSE,

CHAIRMAN.

November 1st, 1895.

TWENTY-FIFTH ANNUAL REPORT OF THE Free Library and Museum Committee, FOR THE YEAR ENDED SEPTEMBER 30, 1896.

THE Free Library and Museum Committee have very much pleasure in presenting to the Council their Twenty-fifth Annual Report.

The Institution was never in a more flourishing condition than at present, nor more appreciated by the ratepayers. The issues of books are considerably in advance of last year's, and although fewer new books have been added, the Library is well up to date in all important particulars. The total number of books now in the Library is 28,858. This is 315 less than last year, but over 1,200 books have been withdrawn as worn out and obsolete, a great number of which are not worth replacing. Those interested in the minuter details of the work done are referred to the tables which accompany this Report, and to the Librarian's comments upon them.

The Children's Library, which had just been started at the time of the last Report, has had a very successful year, and there are over 700 borrowers between the ages of 8 and 14 who are being supplied with suitable literature. These young folks took out upwards of 21,000 books during the year, and the success which has attended this department has fully justified its establishment.

The Committee are now able to report also on a year's work at the Arboretum Branch Reading Room. The number of visitors has been carefully recorded during six months of the year, and the attendance in those six months has reached 54,135. Averaging this for the year, the readers would number 107,257, or considerably more than the population of the Borough. So far, the experiment is an entire success, and the

provision of such a room has been highly appreciated. The cost of its maintenance will probably be about £75 a year, and this expense, and any similar ones which may be incurred, must necessarily be at the cost of the Central Library. As pointed out last year, the provision of Branch Libraries and Reading Rooms is simply one of finance, and the Committee feel that with their present income, they have gone as far as they can go without seriously impairing the usefulness of the parent establishment.

A Catalogue for the Children's Library was published early in the year, and has sold well. The Catalogue of the Scientific books in the Reference Library, the publication of which has been unavoidably delayed, is nearly ready, and will be published between now and Christmas.

The building is in a good state of repair, and the amount necessary to be spent on repairs and alterations is less than for many years past. The close of last year left the Committee with a balance of £104 against them; this has now been reduced to about £2, although there is a liability of £30 for books ordered and not received. Seeing that the equipment and first year's maintenance of the Branch Reading Room has absorbed £158, the Committee feel that the result is a satisfactory one, although the amount spent on new books has had to be considerably reduced. With no immediate special expenses that they know of, the Committee hope that this may be remedied next year.

The Committee, in closing this Report, beg to thank the numerous public bodies and individuals who have given books, newspapers, magazines, and other articles during the past year, and they once more gladly bear witness to the zeal and efficiency with which the Librarian and his staff discharge their duties.

On behalf of the Committee,

GEORGE BOTTOMLEY,

Chairman.

October 26th, 1896.

LIBRARIAN'S REPORT.

*To the Chairman and Members of the Derby Free Library and
Museum Committee.*

GENTLEMEN,

I HAVE very great pleasure in laying before you my Eleventh Annual Report. The year, although presenting no special features, has been a busy one, and I believe that at no time in its history, has the Institution been more popular or more useful to the ratepayers. I have prepared for your information the usual tables, and on those a few remarks will perhaps be acceptable, not only to yourselves, but to the Council, and to the large section of the general public who take an interest in the Library, and its work.

Tables 1 and 2 deal with the Lending Department, the first with the stock, and the second with the issues. Reductions in the stock have been brought about in three ways, five volumes have been lost and paid for, ten have been destroyed because they have been in infected houses, and those who are at all nervous about the Library being a possible source of infection may be re-assured that every possible precaution is taken to prevent it. Three volumes have been totally lost through default of both borrower and guarantor, not a large number considering the vast number of books issued. The stock has been further reduced by a very large number of books withdrawn as worn out. A large number of these were the old three volume novels, to which I believe we have now finally bid farewell, and do so without regret. Those worth replacing are certain to be issued in one volume form, and our shelves are rid of an encumbrance. Against the 1,268 books withdrawn, we have only replaced at present 305. A large number will not be replaced, but about 120 are on order, and the Book Committee have another long list to go through. The new books added during the year have been 518 against 1,037 last year, but in the latter number were included 474 for the Children's Library. The amount spent on new books during the year is £173 against £276 last year, but £59 of the latter amount was incurred for the Children's Library. The total stock stands at 445 less than at the commencement of the year. Turning now to the issues, it will be noticed that there is a gross increase of

about 7,000, and an increase in the daily issue of 29, which now reaches 637, as against 438 in November, 1885, when I first entered your service. The first year of the Children's Library has been an unqualified success. The daily average for the whole year is 81, but for the month of March it was 112, and on one Monday evening, no fewer than 202 books were issued. The lowest month for issues is August, and the lowest day of the week, Wednesday. I am very glad to be able to report once again that there is little fault to be found with the way that the books are used.

Tables 3 and 4 deal with the Reference Department. Here we have increased our stock by 130 volumes, about the normal rate, for in the 286 reported last year, there were 122 volumes of Patents, none of which appear in this year's list. The daily issue is less by 9 than last year, but the fact that there were 1,000 less Patents consulted, and that there was only one course of University Extension Lectures will more than account for the slight falling off. It must be also borne in mind that now the great majority of those who use the Reference Library are students, and are not, as was formerly the case, largely mixed with those who simply come to look at picture-books.

Table 5 gives miscellaneous information. From it we learn that the new borrowers during the year reached 1,350, of whom 468 were children. The sexes are pretty equally divided, and Table 6 shows in a classified form the occupations of the last thousand. The same thousand borrowers reside in the wards shown in the following Table, the reading population varying little from former years in its distribution.

WARD.	PER THOUSAND.	
	Actual Number of Borrowers.	Number to be expected according to Population.
Arboretum.. .. .	123	168
Babington	163	122
Becket	246	198
Castle	59	115
Derwent	59	64
Friar Gate.. .. .	122	113
King's Mead	120	145
Litchurch	108	75

649 over-due books had to be written for, and a proof of the popularity of the bespoken system is to be found in the fact that 1,175 books were bespoken. 2,760 books passed through the binders' hands for greater or

less reason, of which at least 2,300 were done on our own premises. Table 7 simply gives general results summarised in such a form that the year's work can be easily compared with that of its predecessor.

The attendance in the Newsrooms shows no falling off, and although on the first opening of the Arboretum Branch some little difference was noticed, they are now fuller than ever. The average attendance at the Arboretum Branch has been 345 daily, that at the central Reading Rooms, at least four times the number. The behaviour of those who visit all the Reading Rooms leaves little to be complained of, and the petty pilfering I have often had to deplore has been all but absent during the year.

Work in the Museum has progressed slowly and steadily. The sub-committee having charge of the re-arrangement has met weekly during the year, and their time has been principally devoted to the Invertebrates. They have carefully gone over all the specimens that existed in the Museum, have got rid of the imperfect and worthless, and have prepared a list of typical specimens to be obtained in the various classes. Some of these have already been obtained, others are on order, and in the course of a few months they will be available for the public. An important purchase of British Land and Freshwater Shells was made from the collection of the late Mr. Hagger, of Repton, and with the specimens already in stock, a tolerably complete case has been prepared, and these have been arranged and labelled, spaces being left for the species we do not possess. The Rev. Canon Carr, of Holbrook, has enriched the Museum by the presentation of a cabinet of Lichens and Mosses.

The Annual Conference of the Library Association was held this year at Buxton, and in addition to attending it as the representative of this Institution, I was asked to perform the duties of Local Secretary. The meetings were exceedingly useful to those employed in Library work. I had the honour of being elected a member of the Council for the sixth year in succession, and have since been elected President of the North Midland Branch, which embraces the counties of Derby, Nottingham, Leicester, Lincoln, and parts of Yorkshire and Northants.

An important change in our staff has taken place this year through the resignation of Miss Miller, who for very many years occupied an important post in the Library, discharging its duties in a manner highly creditable to herself and acceptable to the public. Her departure necessitated a general re-arrangement of duties, but the other members of the staff have done their best to meet the circumstances, and I have no reason to believe that the interests of the Library or of the public will suffer. Of the zeal of the whole of the staff in your service I have spoken before in

terms of high praise, and there has been nothing during the past year to alter my good opinion of them.

My own labours have been made lighter and pleasanter by your ready acquiescence in whatever suggestions I have made for the better carrying on of the work of the Institution, and I cannot do less than express to you my sincere obligations, while the Library and the Institution as a whole, as well as the officers, owe much to the local press for their ready co-operation and help.

I remain, Gentlemen,

Your obedient Servant,

WILLIAM CROWTHER,

Librarian and Curator.

October 26th, 1896.

FOURTEENTH ANNUAL REPORT

OF THE

Corporation Art Gallery Committee.

THE Art Gallery Committee have much pleasure in presenting their Fourteenth Annual Report to the Town Council. As usual, a comparative table of the visitors for the last three years is given below.

		1893-94	1894-95	1895-96
Visitors to Autumn Exhibition	..	20300	17747	17707
" Spring "	..	20840	18070	17300
" Summer "	..	13156	11980	12150
Total Visitors	..	54296	47797	47157
Total Days Open by Payment	..	164	160	164
" " Free	..	86	89	87
Total Days Open	..	250	249	251
Average on Paying Days	..	83	68	62
" Free Days	..	473	415	425

There is nothing special to remark with respect to these figures, except that the number of visitors on the free days slowly increases, while that on the paying days as slowly diminishes. The total number of visitors to the Gallery since its opening is now 533,649.

The deficit to be paid by the Council is about £10 more than last year. The pictures sold at the Exhibitions totalled the catalogue value of £373 11s. 0d., being £132 less than last year, but the result is perhaps as good as can be expected, and is considerably better than that of many larger towns. The Art Union realised £87 9s. 0d., £12 more than in 1895.

Every effort has been made to keep up the standard of the pictures exhibited, and the Committee believe that end has been attained. The Autumn and Spring Exhibitions reached a high level of merit, and the Hanging Committee had a much larger number of pictures submitted than they could place, a gratifying proof of the rising estimation in which the gallery is held by artists generally. The Summer Exhibition consisted of Photographs, and the pictures exhibited were both interesting and of

good workmanship. The usual medals were offered, and some of the best artists in the country sent works for competition. In connection with this exhibition, the best thanks of the Committee are due to Mr. A. B. Hamilton, and to Mr. Councillor Winter for the medals they kindly gave to local photographers. Some excellent work was exhibited, but the Committee would have been glad to have had more exhibitors.

The Autumn Exhibition now open, is equal to any of its predecessors, and seems likely to be popular with the public, for above three thousand visitors passed the turnstiles during the first fortnight.

The four cases of Art objects lent by the Science and Art Department were renewed in May last, and the Committee desire to acknowledge the courtesy of the officials at South Kensington, and their anxiety to lend objects which are of practical use to the Art industries of the town and neighbourhood. Other objects of interest have been lent by various persons during the year, to whom the thanks of the Committee are cordially due.

The fine collection of old Derby China belonging to the Gallery has been a greater attraction than ever during the past year, and more collectors brought specimens for comparison and identification than at any previous period. The debt of gratitude due to the generous donors of this collection is increasing, and the Committee are glad to know that their generosity is being so thoroughly appreciated.

The Saturday Concerts organised by the Curator reached their eleventh season during last winter. They have done much to popularise the gallery, and the Committee desire again to place on record their thanks to the host of friends, both amateur and professional, who have gratuitously given their services.

The warmest thanks of the Committee and the Council are due to Mr. Councillor Edgar Horne, who has this day presented to the Gallery a valuable Kirkman Concert Grand Pianoforte.

The building is in good repair, and some alterations in the heating apparatus, effected at slight cost, have made the entrance hall and Galleries much more comfortable during cold weather.

The Committee have once more pleasure in testifying to the well directed efforts of the Curator for the benefit of the Gallery, and to the energy and tact with which he discharges his duties.

On behalf of the Committee,

WILLIAM BEMROSE,

Chairman.

October 26th, 1896.

TWENTY-SIXTH ANNUAL REPORT

OF THE

Free Library and Museum Committee.

FOR THE YEAR ENDED SEPTEMBER 30, 1897.

.....

THE Free Library and Museum Committee have pleasure in laying before the Town Council their Twenty-sixth Annual Report.

They are glad to report that the Institution of which they have charge is in a prosperous condition. The Library now contains 30,184 volumes, an increase of 1,326 over last year's return. The issues are slightly less, but this, and all other matters of detail are fully discussed in the accompanying Report from the Librarian, to which, with the tables appended, all interested in the details of the work done, are referred.

The Children's Library retains its popularity, and is doing good work, although the novelty has somewhat worn off, and the Committee are more than ever convinced that the step they took in establishing it was a wise one.

The second year's work at the Arboretum Branch Reading Room is also very encouraging. The attendances were counted during the months of December, March, June, and September, and reached the total of 37,829. This gives for the year at the same rate, a total of 113,487, as compared with 107,257 last year. The cost of its maintenance has been kept well within the Committee's estimate.

The Catalogue of the Scientific works in the Reference Library has been published during the year, and also a small new edition of the books in the Devonshire Library, bringing it up to date. The

gradual republication of the Catalogue in classes is being proceeded with; the Fiction division is nearly ready for the printer, and the third division which is to consist of History, Biography and Travel, is in progress.

The re-arrangement of the Museum is steadily progressing, and the Committee which has the work in hand has done a good year's work, principally among the Invertebrates. Further details respecting the Museum will be found in the Curator's Report.

The building is in a good state of repair, and the amount spent on keeping it so has been again comparatively a small one. With no special expenses during the year, the Committee have been able to go back to the usual amount spent on the Library proper, and they see no reason why this amount should not be further increased during the coming year, as there seems to be no probability of any special outlay.

The Committee note with very great regret, the death of Mr. William Hobson, J.P. for twenty-three years Chairman of this Institution. At their meeting on October 30th, 1893, when they received his resignation, they placed on record their conviction that "His unremitting attention to the interests of the Institution has done much to place it in its present prosperous condition." In his retirement its welfare occupied much of his thoughts, and the remembrance of the work he had done in connection with it was always a source of keen pleasure to him.

It is the duty of the Committee in closing this Report to thank the numerous donors of books, newspapers, magazines, and Museum specimens for their gifts during the past year, and they desire further to place on record their high opinion of the way in which the Librarian and all his staff perform their duties.

On behalf of the Committee,

GEORGE BOTTOMLEY,

Chairman.

October, 28th, 1897.

LIBRARIAN'S REPORT.

*To the Chairman and Members of the Derby Free Public
Library and Museum Committee.*

GENTLEMEN,

I have much pleasure in laying before you my Twelfth Annual Report and with it the usual tables showing the inner working of the Library. On these I may with propriety make a few explanatory remarks, which I hope will be of interest both to you and to the large section of the general public who use the Library.

Table 1 deals with the Lending Library stock, which is now larger than ever before, the total number of books being 19,337, about a thousand more than last year. 631 new books have been added, and the replacements, which include books worn out during this year and last, number 806. The number of worn-out books for the current year is only 394, and all of these of any value have been replaced. Nine volumes have been lost and paid for, two coming from infected houses have been destroyed, and four have been totally lost through default of borrower and guarantor. About £100 more than last year has been spent on the Library, and the Book Committee have been able to keep it thoroughly up to date. Table 2 deals with the issues, and here it will be noticed that we are about 9000 lower than last year in the gross, and 32 lower in daily average. I find that this is the case in other towns as well, and

there are probably several reasons which might be given in accounting for it, but the principal one in my opinion, is the fact that the past year has been a good one for business. Most of the people who use the Library and Newsrooms have been in constant employment, and have had less time for reading, and some degree of the novelty which attached to the opening of a special Children's Department has worn off. Of the decrease referred to over 3000 are in the Children's Library, and 5000 in Fiction, all other classes remaining about the same. I am glad to report that there is very little to complain of in the way the books are used.

Tables 3 and 4 deal with the Reference Library. The total number of books here is 10,847, including 2,822 volumes of Patents. The additions number 298 (including 121 Patents) against 130 last year, when no patents were included. The daily issue is 43 against 41 last year, and there were 2,206 Patents consulted against 2,594 last year.

Various miscellaneous items of information are collected in Table 5. The number of borrowers also shows a decrease, but the proportion between the sexes remains about the same, and Table 6 giving the occupation of the last thousand borrowers shows that all classes are represented among them. Those described as of no occupation are mostly married women, and to that extent, the term is, or should be, a misnomer. The distribution of the same thousand borrowers among the wards of the town is shown in the table below, which varies only slightly from former years. Babington, Becket, Derwent, Friar Gate and Litchurch Wards all contribute above their share; Arboretum, King's Mead, and Castle are below their proper number, although there is a considerable advance in the ward last named.

WARD.	PER THOUSAND.	
	Actual Number of Borrowers.	Number to be expected according to Population.
Arboretum	107	168
Babington	148	122
Becket	237	198
Castle	70	115
Derwent	71	64
Friar Gate	165	113
King's Mead	103	145
Litchurch	99	75

Books which were overdue had to be written for to the number of 969, and no fewer than 4,059 books passed through the binders' hands for greater or less reason. Of these at least 3,600 were dealt with on our own premises. No fewer than 1,232 books were bespoken by borrowers during the year, Table 7 summarises the principal figures of the year for purposes of comparison.

The attendance in the Newsrooms has been slightly less than usual, although the actual numbers have not been taken. There is no complaint to be made about the order, and I find that the habitués of the rooms are as anxious to preserve quiet as we ourselves. Neither petty theft nor mutilation of magazines has been quite absent during the year, either in the Central Reading Rooms or at the Arboretum, and the class of magazine stolen generally shows the literary tastes of the thief or thieves to be of a somewhat high order.

The work of re-arranging the Museum has proceeded steadily during the entire year, and the sub-committee charged with the work has been fully occupied. The Invertebrates, beginning with the lowest forms of life, and proceeding as far as the Mollusca, are practically finished and fill one of the large wall cases, and the Mollusca will next receive attention. The work already done has met with approval from various visitors well qualified to judge. The specimens in the "Birds" bequest have all been carefully gone through, those wanted for our own collection selected, and the duplicates have been offered on loan to various Schools and Colleges in the town, several of which have accepted the loan on the terms offered. The collection of early electrical and galvanic apparatus, made by the late Mr. J. A. Warwick, and presented to the Museum by Mr. Herbert Strutt, J. P., will most of it be disposed of in the same way.

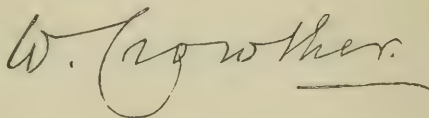

I had the pleasure of attending the Second International Library Conference held in London in July last as a representative of this Library, and much enjoyed and profited by the meetings.

In concluding this Report, I have once more to express my acknowledgments to the local press, for their ready co-operation and help in anything likely to benefit the Institution. From the staff I have had cheerful and efficient help, and I believe that all are animated by the desire to make the benefits of the Institution fully available to the inhabitants of the town. My own work

throughout the twelve years I have been in your service, has been a pleasure to me, and I hope I may continue to merit your approbation.

I remain, Gentlemen,

Your obedient servant,

A handwritten signature in cursive script, reading "W. Crother". The signature is written in dark ink and is underlined with a single horizontal stroke.

Librarian and Curator.

October 28th, 1897.

FIFTEENTH ANNUAL REPORT

OF THE

Corporation Art Gallery Committee.

THE Art Gallery Committee have pleasure in presenting their Fifteenth Annual Report to the Town Council. According to custom, a comparative table of the number of visitors for the last three years is given below.

	1894-95	1895-96	1896-97
Visitors to Autumn Exhibition	17747	17707	14360
" Spring " 	18070	17300	15340
" Summer " 	11980	12150	12152
Total Visitors	47797	47157	41852
Total Days Open by Payment	160	164	178
" " Free	89	87	90
Total Days Open	249	251	268
Average on Paying Days	68	62	53
" Free Days	415	425	361

It will be noticed that the number of visitors is below those of previous years, a result which has characterised the returns from many other Art Galleries and Museums during the current year. The proportion between the numbers on the free days and paying days remains at about seven to one. The total number of visitors to the Gallery since its opening is now 575,501.

The deficit to be paid by the Council is £17 less than that of last year. The catalogue value of the pictures sold at the Exhibitions is £449 12s. od., which exceeds last year's result by £76. The Annual Art Union was again a success.

The usual number of Exhibitions was held during the year, the Autumn and Spring consisting as in former years, of modern pictures in both oil and water colours. The Committee believe that the standard of the works exhibited steadily improves, and for each Exhibition more pictures were submitted than could possibly be hung. This is a very cheering sign, proving that the Gallery continues to hold its place in the estimation of artists. Mr. Calderón's picture of the "Renunciation of Elizabeth of Hungary"

was lent by the Chantrey Trustees, and Sir George Paget lent his own portrait by Professor Herkomer to the Spring Exhibition. The Committee were fortunate enough to secure for the Summer Exhibition the first Travelling Collection of Water Colours from South Kensington. This fine collection proved of great value to Art Students, and of interest to the general public.

The Autumn Exhibition, now open, is equal to any of its predecessors in merit, and about one hundred and fifty pictures had to be rejected for lack of space. Up to the present time, both attendance and sales have been satisfactory.

The four cases of Art objects lent to the Gallery by the South Kensington authorities were changed in June last, and are of an interesting and useful character. The Committee have once more to acknowledge the courtesy of the officials of the Department, and their anxiety to meet the wishes of the Committee in the objects selected. Large use has been made during the year of the facilities afforded for copying these objects, and the Committee hope that much benefit will result to manufactures carried on in the Borough from the advantages thus offered by the Gallery. Other Art objects have been lent by various persons during the year, to all of whom the thanks of the Committee are due.

The twelfth season of Saturday popular Concerts, organised by the Curator took place last winter, and to the musical friends, both amateur and professional, who assisted, the best thanks of the Committee are again due.

The Committee have to report that the building is in a good state of repair, and that the charges under this head have been but slight during the past year, while the establishment charges are also lower than last year's. Everything in connection with the Gallery has been worked as economically as possible, consistent with efficiency, and the Committee think that the Council may be congratulated on the success of a valuable institution being maintained at so small a cost.

It only remains to express our full appreciation of the zeal and efficiency with which the duties of the Curator are discharged. To his good management is largely due the success of the Gallery.

On behalf of the Committee,

WILLIAM BEMROSE,

Chairman.

October 28th, 1897.

Twenty-sixth Annual Report

OF THE

Free Library & Museum Committee

For the year ended September 30th, 1898.

THE Free Library and Museum Committee have pleasure in laying before the Town Council their Twenty-seventh Annual Report.

The Library and Museum are in a prosperous condition. The Library now contains 31,210 volumes—an increase of a little more than a thousand during the year—and full details respecting it and its working will be found in the Librarian's Report to this Committee and the tables appended to it. The Committee have made no new departure during the year, but the usefulness of the Institution as a whole has been fully maintained.

The Arboretum Branch Reading Room fully justifies its establishment, and the numbers using it show a steady increase. In the four months of the year in which the visitors were counted, the numbers reached 40,091, giving a total for the year of 120,273, which is 6,700 more than last year, and 13,000 more than the first year in which it was open. The special exit into Rose Hill Street, for use during the last hour of the evening, has proved a great boon, and the Committee desire to acknowledge the readiness with which the Arboretum Committee met their views when the subject came under discussion. The cost of maintenance keeps well within the Committee's estimate, although this year there has been special painting and cleaning to be provided for.

The re-arrangement of the Museum still steadily progresses under the direction of the Sub-Committee charged with the work. Some valuable donations to the Museum will be found in the lists this year, among the most important of which are a number of horns from South Africa, presented by Colonel J. A. Spreeckley, of Bulawayo, a former townsman. To the same gentleman's good

offices the Committee are indebted for the purchase of a lion on very favourable terms. This the Museum Committee hope to have in its place about Christmas. Another important addition is the bequest of a collection of Army and Navy Medals, which the Committee have received through the executors of the late Mr. W. Litchfield, of Gerard Street. Special cases are being arranged for these on the Museum corridor. Another important gift is that of the "Hutton Memorial," secured through the efforts of Mr. Sidney B. Eckett, late of Derby and now of Birmingham. This consists of a small collection of the famous Derby historian's printed works, and also his portrait. The former have been placed in the "Devonshire" Library, and the latter hung on the Museum corridor.

The buildings are in a good state of repair. Special expenditure has been incurred during the past year in building a small wash-house at the Porter's lodge; in providing a new entrance to the basement on the Strand side, in order to obviate heavy goods being brought in at the front entrance and carried down the steps; and the various parts of the building have been connected by telephone. All these alterations were very much wanted, and their provision is a great increase to the general convenience.

An important change in the staff arrangements was necessitated in March last, when Mr. H. M. Haywood, who had been Clerk to the Committee for nearly twenty years, was appointed Chief Constable of the borough. After consideration, the Committee unanimously decided to hand over his duties to the Librarian—an arrangement which works well. The Committee would like to place on record in this Report their sense of the valuable services rendered to the Institution by Mr. H. M. Haywood during the long period in which he held office, and of his unfailing courtesy and zeal in the discharge of his duties.

It is the duty of the Committee, in closing this Report, to thank the numerous donors of books, magazines, newspapers, and Museum specimens for their donations during the year just closed, and to once more place on record their satisfaction with the way in which Mr. Crowther and his staff discharge their duties both to the Committee and to the public.

On behalf of the Committee,

GEORGE BOTTOMLEY,

October 27th, 1898.

Chairman.

LIBRARIAN'S REPORT.

To the Chairman and Members of the Derby Free Public Library and Museum Committee.

GENTLEMEN,—

IT gives me very great pleasure to lay before you my Thirteenth Annual Report, which is accompanied by the usual Tables explaining the details of our work. On each of these I may be allowed to say a few words, which I hope may be of interest not only to you, but to that large section of the inhabitants of the town who use or are interested in the Library.

From Table I. it will be seen that the Lending Library stock is now nearly twenty thousand volumes, and the questions of shelf room and space on the Indicator will soon become acute. 692 new books have been added, and out of the 499 withdrawn as worn-out, 460 have been replaced. Nine volumes have been lost and paid for, and four have been totally lost. The issues are shown in Table II., and show a decrease of nearly 10,000, or a daily decrease of 38 from last year's results. I find that this decrease is a general one in various parts of the country, and the principal reason for it is probably to be found in the general prosperity of the country, plenty of work affording less leisure for reading. The exceptionally fine weather which has prevailed during the greater part of the year, and the great popularity of the bicycle as a means of recreation, have also something to do with the result. There is some consolation in knowing that the amount of solid reading remains about the same, the principal decreases occurring in Fiction (about 7,000) and in Juvenile books (about 2,000). I am very glad to report that I have had no serious complaint to make about the usage of the books during the year. The Reference Library stock stands at 11,233, which includes a little over 3,000 volumes of Patents. Of these, 1,147 have been consulted, as against 2,206 last year. 169 volumes other than Patents have been added, and the daily issues in the various classes differ little from former years.

Table V. gives a variety of information. From it we gather that the number of new borrowers is about the same as usual—rather more adults and rather fewer children having joined than last year. 1,160

borrowers have had to be reminded that their books were overdue; but the offences cannot have been of such long standing, as the amount which had to be levied for fines is considerably less. No fewer than 3,736 volumes had to pass through the binder's hands for greater or less reason, 519 of which had to be re-bound. All the small repairs, all the numbering, labelling, and lettering (except where books were re-bound) were done by our own man on the premises. The Table giving the occupations of the last thousand borrowers is always an interesting one, showing that all classes and occupations are represented. This year's shows no new features, and the same thousand borrowers are distributed among the Wards as shown in the Table below, on which there is no new remark to make.

WARD.	PER THOUSAND.	
	Actual Number of Borrowers.	Number to be expected according to Population.
Arboretum	143	168
Babington	132	122
Becket	261	198
Castle	56	115
Derwent	76	64
Friar Gate	130	113
King's Mead... ..	113	145
Litchurch	89	75

Our new Fiction Catalogue was issued after the Annual Stock-taking, and sells well. A new edition of the Children's Catalogue is ready for the printer, and the next section of the General Catalogue—that embracing History, Biography, and Travel—is in a forward condition. We hope soon to have the Card Catalogue system in operation for showing recent additions, and for the Reference Library as a whole.

The News-rooms are quite as fully used as ever, and I should say that the number using the rooms is larger now than it was before the branch at the Arboretum was opened, while the attendance at the latter increases month by month. The Book Committee went thoroughly into the list of newspapers and magazines at the beginning of the year, and considerably revised and improved it at an additional expenditure of about £14 annually. New lists have been posted in each room, of the magazines to be found there, while a general list in the front corridor shows the names of all that are taken. I have no complaint to make of the conduct of those who use the rooms.

The work of re-arrangement in the Museum has gone on steadily, and the Sub-Committee entrusted with the work has been occupied mainly with the Mollusca. The foreign species, much the larger portion, are complete, and we are now at work on the British varieties. Purchases have been made where necessary, and altogether some 1,650 specimens, displayed on 48 trays, have been arranged, mounted, and labelled. A large number of specimens from the "Birds" collection have been lent to the Technical College, to the Higher Grade Board Schools in Gerard Street, and to other Schools, and still other Schools are making selections. As will be seen from the list, we have received a number of valuable donations, and the lion which has been purchased, and will be in its place shortly, will be a most useful addition to our limited collection of mammals. The shaft of a cross from old St. Alkmund's Church, which formerly stood in the garden, has been brought indoors.

The Institution of Mechanical Engineers held its annual meetings in Derby last July, and the Committee granted the use of our buildings for a *Conversazione* given by the local Reception Committee to the members, and His Worship the Mayor (Mr. Alderman Duesbury) has since given a similar entertainment to a very large number of guests. Our buildings once more proved their adaptability for such a purpose, and, although at times rather crowded, both functions were very successful.

I attended the Annual Conference of the Library Association, held this year at Southport, on which I have already fully reported to you, and I have been again elected a member of the Council of that body, which, by the way, has received a Royal Charter of Incorporation during the year.

In completing this report, I have again to acknowledge the hearty co-operation of the local press in forwarding the interests of this Institution, which has never been more in evidence than during the past year; and I have great pleasure in bearing testimony to the good and willing work done by all the members of my staff. My own duties have increased, but, thanks to your kindly help and consideration, they are a pleasure to me, and the well-directed work of the various Sub-Committees does much to lighten them.

I remain, Gentlemen,

Your obedient Servant,

W. CROWTHER,

October 27th, 1898.

Librarian, Curator, and Secretary.

Sixteenth Annual Report

OF THE

Corporation Art Gallery Committee.

THE Art Gallery Committee have pleasure in presenting to the Town Council their Sixteenth Annual Report. The number of visitors is about the same as last year, although the Gallery has been open 22 days less. The average attendance shows improvement, and on paying days is rather less than one-sixth of that upon free days. Below is given a comparative table of the number of visitors for the last three years. The total number of visitors since the opening of the Gallery is 616,935.

	1895-96	1896-97	1897-98
Visitors to Autumn Exhibition ...	17707	14360	12948
" Spring " 	17300	15340	14720
" Summer " 	12150	12152	13766
Total Visitors... ..	47157	41852	41434
Total Days Open by Payment... ..	164	178	163
" " Free 	87	90	83
Total Days Open	251	268	246
Average on Paying Days	62	53	60
" Free Days	425	361	381

Three Exhibitions have been held during the past year, those for the Autumn and Spring being on the usual lines, and consisting of modern pictures in both oil and water colours. At both Exhibitions the sales were satisfactory, although rather below those of last year. Additional interest was given to the Spring Exhibition by the loan of nearly forty pictures from the fine collection of Merton Russell Cotes, Esq., F.R.G.S., of Bournemouth, who placed the Committee and the Town

under further obligation by increasing the number to one hundred and thirty pictures for the Summer Exhibition. This admirably selected collection of works of art has been an immense attraction, and is to remain in the Gallery until the close of the year. The warmest thanks of the Committee and of the Council are due to Mr. Cotes, and also to the Corporation of Oldham, who lent to the Gallery for the Spring Exhibition their grand picture, "The Last Furrow," by Mr. H. H. La Thangue, A.R.A. The Summer Exhibition was completed by a collection of pastels and black and white drawings executed by the late Mr. Arthur J. Cox, of Derby, which were a source of interest not only to his many personal friends, but to the public at large.

The Autumn Exhibition now open has been well attended up to the present. In view of the fact of Mr. Cotes's pictures remaining, it was decided to invite artists to contribute water colours only, and a very good collection is the result. The Art Union, usually held in December, is to be omitted this year.

The four cases belonging to the authorities of the South Kensington Museum had their contents changed at the usual time, and such objects as are likely to be most useful to art students and to the art industries of the town have again been lent. The Museum officials have always shown themselves most anxious to meet the wishes of the Committee as to the class of objects sent. Mr. W. T. Key, who has almost invariably had charge of the annual change, has recently retired from the service, and the Committee cannot but regret the severance of a connection which has always been a most pleasant one, and hope that Mr. Key will enjoy for many years his well-earned leisure. A most interesting case of art objects is now on loan from Mr. Councillor Arthur Wilson, to whom the thanks of the Committee are due for this proof of his interest in the welfare of the Gallery.

Early in the year, the Committee received the welcome intelligence that Colonel Sale, R.E., intended to bequeath a portion of his splendid collection of pictures to the Gallery; and later, Colonel Noel, of the Outwoods, has announced his intention of giving some valuable antique tiles. Mr. Councillor Winter has presented a series of photographic portraits of the County and Borough Magistrates holding office at the time of Her Majesty's Diamond Jubilee, in 1897—very interesting now, and likely to become more

so in years to come—and the Committee have also received several other minor gifts. These valuable contributions point to the popularity of the Art Gallery and to the educational and recreative advantages it affords to the town. The present Gallery is now full, and the Committee wish to suggest that the Council, in the midst of its other schemes for the benefit of the town, do not lose sight of the necessity of providing a home for the generous gifts already promised. Such valuable gifts to the town by her generous citizens and friends, amounting in value to some thousands of pounds, fully repay the cost incurred in providing room for them, and such provision will add but little to the present cost of maintenance.

The building is in a good state of repair, and the charges for its maintenance have been but slight, while the ordinary establishment charges have been kept at the lowest possible level consistent with efficiency. The amount to be asked for from the Council is larger than usual, but this amount is exceptional, and is accounted for by the heavy charges necessary under the head of Insurance for the special loan collections. Owners of valuable pictures naturally expect their loans to be fully safeguarded when lent to public Galleries; and, bearing in mind the advantages reaped by art students and the public generally by the sight and study of valuable pictures otherwise inaccessible, the Committee think the money is well spent.

It only remains for the Committee to add the expression of their satisfaction with the great interest and intelligence with which the Curator, Mr. Crowther, fulfils his duties, and the able way in which he is supported by his staff.

On behalf of the Committee,

WILLIAM BEMROSE,

Chairman.

October 27th, 1898.
